

Our goal is to empower independent agencies with the right tech to help them work better, save time, and increase efficiencies. That's why we've designed a user friendly platform to streamline the quote process.

TARMIKA ALLOWS YOU TO:

- Create an additional distribution channel for independent agent carriers
- Participate in the insurtech space without having to create new processes or over-spend allocated funds
- See increased visibility and exposure to classes of business that have previously been difficult to attain
- Easily access quotes performed on the Tarmika platform: they are saved in the carrier quote page in order to continue the bind process and "block" other agents from quoting the business

IN THE TARMIKA PLATFORM:

- You can (directly from our platform): email your company specific underwriter, print a company-specific proposal, upload loss runs or photos, and bridge to the carrier portal to continue the bind process
