Mary-

Foti and I discussed the barrier issue and have come up with this solution:

On TOWN-OWNED PROPERTY (town streets, parking lots) robust barrier protection is required around the table area.

This can be Jersey Barriers, significant concrete planters, 55 gallon drums filled with water--all spaced 60" apart or closer.

On PRIVATE PROPERTY (and private liability) the table area shall be separated by HIGH VISIBILITY markings, such as day-glo road cones or partitions arranged 60" apart or closer. These markings must be readily visible to drivers approaching the table area in their vehicles.
