REACH YOUR CYBER SUMMIT!

THE DECEMBER 31, 2017 DEADLINE IS FAST APPROACHING!

All DoD Contractors and Subcontractors are required to be in compliance with DFARS 252.204-7012 by December 31, 2017 and must complete a cyber assessment, present a remediation plan and status of compliance, and provide a POA&M.

The trek to compliance usually takes from 6 to 12 months . . . .

USER BENEFITS

- Brings Clarity of Purpose
- Puts the User in the Driver Seat
- Builds Confidence to Handle Growing Requirements
- Reduces Anxiety by Making Compliance a Controlled Process

"If you want to make an easy job seem mighty hard, just keep putting off doing it!"

Olin Miller

The Imprimis i2ACT-800 database software tools make implementing the NIST SP 800 series manageable, allowing you to focus resources on critical requirements. The tools have been designed with you in mind and bring an organized, user-friendly, and sequential approach to cyber compliance.

The built-in efficiencies reduce the labor and cost of compliance to a small fraction of what would be required for manual compliance using spreadsheets to map out the required control matrix. The tools allow you to easily navigate the regulations pertaining to your industry and establish and maintain a tailored baseline based upon the Risk Management Framework (RMF) process. It also documents your progress and ensures your team's preparedness for internal and external audit success.

FUNCTIONAL BENEFITS

- Planning Within Resources
- Provides On-the-Job Training
- Improves Accuracy in Compliance Efforts
- Reduces Total Team Labor by 50% or more
- Integrates Corporate Team (Management, IT, HR, Security, Sales)
- Tool is Regularly Updated with New Requirements and Regulations
- Gain Control by Clear Requirements, Processes for Assessing and Complying
- Provides Management Control over External Bids and Internal Plans
- FAST, AFFORDABLE, EFFECTIVE – THE i2ACT-800 BRINGS ALL THREE

FEATURES

- Searchable Database
- Traceability and Trend Analysis
- Wide Variety of Reports
- Intuitive User Interface
- Provides Guidance and Best Practices
- Can Incorporate Scans and Other Documents
- Customizable Baselines and Easy Tailoring
- CUBE Support and Ticketing System
- User Training and Manuals – User Groups
- Produces a Remediation Plan and POA&M for System Security Plan
- Policies, Procedures, Incident Response Plan
- Standards & Practices (NIST, DFARS, DSS AAPM, RMF, CNSS, etc.)
- Rollup report for Multiple Networks, Divisions, Subcontractors, Locations
