Coming in July, a New Member Portal and Website

ACEC Ohio

WEBSITE L A U N C H

July 2024

ACEC Ohio has exciting news to share with our members. We are launching a new website and Association Management System (AMS) in July! The purpose of the new software is to give our members easier access to resources and information that is important to you individually.

You'll soon have access to a new online member center. The Member Center will be built for ease of use and quickly finding information. It will include self-service that allow you to:

- View and pay invoices
- View, register for, and pay for events
- Update your individual profile contact information
- Update your organization's directory listing information
- Subscribe to lists and committees
- View your own professional development certificates from ACEC Ohio

And much more!

Members will need to create a login for the new Member Center (instructions to come). Once you're logged in, you'll see the many benefits of the Member Center includes:

- Member Directory - Maintain your contact information for the member and public directories.
- Resources - Gain access to key sites, documents and other member-only information.
- Events - Register for our upcoming events.
- Referrals - Refer new members to our association to help their business grow.
- Email Lists - Subscribe and receive regular communication from us.
- Committees - Increase your involvement in our association by participating on a committee.
- Continuing Education - Enroll, apply and track your progress for Professional Certifications.
- Forum - Network with others by exchanging information, sharing resources, ideas, and more.

If you would like these same benefits on your phone or tablet, you will be able to download the MemberPlus App (by Micronet Inc.).

Along with the new Member Center/AMS, we will be launching a new website that's easy to navigate and includes the same ACEC Ohio information as our current website with a fresh new look!

We are excited to launch our new website and AMS! Be on the lookout in the next few weeks for information on implementing these new platforms.
