

ELECTRIFY YOUR BUSINESS

WITH CHAMBER EV CHARGERS

**No-cost solution to
powering your customers**

Seminole County Chamber members are now eligible for no-cost EV chargers at their businesses through a new partnership with Optimus Energy Solutions and Chamber for Innovation and Clean Energy. Qualified locations can receive installed chargers at no-cost and free maintenance and upkeep for the next decade.

This program is a complete turn-key solution that provides:

- **Level 2 or DC Fast Chargers for an unlimited number of qualified sites throughout Florida.**
- **No costs associated with the charger infrastructure**
- **No cost upkeep and maintenance of the charging stations**
- **Potential profit sharing at the end of each year**

WHAT IS A QUALIFIED LOCATION?

- Location is owned by the chamber member. Leased locations can work but are not optimal.
- Location has readily available power that is simple to access.
- Owners are willing to agree to a minimum 10-year term for hosting of charger.
- Locations with high traffic counts or long-dwell times.
- Locations that require significant electrical upgrades or long electrical runs should expect to contribute towards the cost of infrastructure. All costs are clearly outlined in advance of any agreement and included in the formal agreement between parties to ensure transparency.

SIX STEPS TO No-Cost Charging Stations

STEP 1:

Your business joins the Seminole County Chamber at a President investment level or higher.

STEP 2:

Your business provides property locations throughout Florida.

STEP 3:

Optimus Energy Solutions evaluates all sites for compatibility.

STEP 4:

Optimus Energy Solutions provides an in-depth overview of all locations and any issues, such as electricity placement, that may need an investment.

STEP 5:

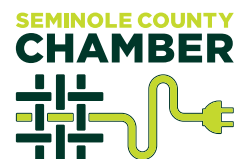

Optimus Energy Solutions works on permitting, installation and upkeep.

STEP 6:

Your business markets to new and existing customers about the charging options available
