Institutions Participating in CSDCAS

The 2022-2023 CSDCAS Applicant Data Report reflects data for the universities participating in CSDCAS during that cycle. The additional programs that joined CSDCAS during later cycles are not listed below or included in this report. To be eligible to participate in CSDCAS, programs must offer entry-level clinical graduate degrees in Speech-Language Pathology or Audiology. Programs must either have achieved or be in the process of pursuing accreditation from the CAA or ACAE.

Accepted Students

Programs participating in CSDCAS are required to provide their final decision data each fall. In 2022-2023, 1 Audiology program out of 57 did not submit their data and 8 SLP programs out of 224 did not submit their final decision data. Therefore, the final data reported here are based only on those programs that provided their final decisions.

CSDCAS applicants with a verified status and the following admission decisions were categorized as “accepted” for the purposes of this report: Offer Accepted, Offer Declined, Offer Made, Deferred, and Matriculated. Applicants with a verified status who received no offers of acceptance to any program in CSDCAS are categorized as “denied.” Data only reflects decisions reported by schools participating in CSDCAS. Applicants who applied via CSDCAS may have also applied to and been accepted by non-participating universities. Only those applicants who had a verified application are considered in this report.

Languages Spoken

Applicants with an intermediate level of proficiency or higher in at least one language other than English (including American Sign Language) are considered bilingual for the context of this report.

Disadvantaged Status

Data regarding disadvantaged applicants is based on optional self-reported responses. Applicants in CSDCAS could have selected one or more disadvantaged statuses. The disadvantaged categories are not mutually exclusive. Therefore, applicants may be represented in more than one category. Applicants were not required to use search tools to determine if they met the federal government’s definition of environmentally disadvantaged (e.g. geographic location of the applicants high school being in a medically underserved area/population or health professions shortage area), but they were instructed to use their parent’s recent tax forms and the federal guidelines to determine economically disadvantaged status.

GRE

CSDCAS collects self-reported and official GRE scores from applicants that have taken the test. These figures reflect the means of the percentiles of self-reported scores. The number of SLP and Audiology programs that used the GRE has declined significantly over the last 3 years. We estimate that 95% of programs required the GRE in the 2019-2020 cycle, but we did not explicitly track this requirement prior to the 2020-2021 cycle.
