

# Best Public Event

## Camden Night Gardens: Tides of Change

Camden Night Gardens is an outdoor nighttime public festival that aims to foster community vibrancy through the arts. This highly-anticipated event transforms underutilized open spaces with temporary light, sound, and projection installations to visually connect neighborhoods, engage the community, and attract visitors from the region. This year featured a 300' zip line, fireworks, large water installations, a sandbox and bonfire pits. By theming this year's event "Tides of Change," we not only incorporated the Delaware River (where the event took place), we also made a statement to residents that their city is investing in programming to improve quality of life.
