

**Labels – It's not a sticky situation,
...when you ask the right
questions.**

WE HAVE PAPER

Well, for the moment at least.

custom printed labels

Process

Nova
Label Co., Inc.
custom printed labels

- Roll to roll
- Roll to sheet
- Roll to fanfold
- Cinnamon Roll 
- Up to 10 printing colors
- Up to 20" press web width
- Varnish, Lamination, Embossing

Labels are primarily printed using the flexographic process.

Digital is an option and is good for short to medium runs or lots of variable information.

UV inkjet, aqueous inkjet and toner-based printing technologies are used in the printing process.

Assorted Materials for Your Application

- Gloss, Uncoated, Laser, Foils, etc., etc...
- Piggyback...Clear and Paper Liner
- NovaNote RPN...Pattern and Full Gum
- White & Clear BOPP Decals
- Static Cling Decals
- Multitude of Adhesives

To Find Efficiencies for Better Costs...

- **BE FLEXIBLE WITH DIE CUT SIZES** -
- What you think prints CMYK may better print as spot PMS color!
- ***1/8" difference in your format can potentially save 1000's of dollars in web rolls of paper***

The Label Printing Process

Label Co., Inc.
custom printed labels

**Not all
Cookie
Cutters
are the
same**

**Flexible dies are the
most economical tools
to use.**

Thank You!
