

YOUR VOICE MATTERS

The Associated Contractors of New Mexico works hard to ensure the construction industry's voice is heard. Working with national, state and local legislative leadership on vital issues affecting the construction industry, ACNM provides direct access to meet elected officials and government decision makers, including hands on participation in lobbying efforts and bill creation.

ADVOCATING FOR YOU!

ACNM works to develop support within the New Mexico construction industry for political actions, initiatives and programs of the chapter and the National AGC, we work to proactively represent the chapter and the industry before state and local government bodies.
