

# Ramsey County Public Works

## 2016-2020 Transportation Improvement Program

## Ramsey County's TIP:

- Focuses on Safety Projects, Congestion Mitigation, and System Preservation.
  - Ramsey County has traditionally not issued bonds for construction.
  - Complexity of projects, especially bridges and interchanges, combined with limited staff, has expanded our use of consultants for design and for construction engineering.
  - Project complexity and constrained rights of way have led to a greater emphasis on modeling and studies prior to the start of design.
  - Ramsey County's prosperity goals emphasize a higher level of public involvement.
-
