COMMUNITY SOLAR

\$25,000!
Fundraising
Target

Community Solar is local solar power plants that are shared by multiple customers (subscribers) providing residents, small businesses, and nonprofits an opportunity to share the benefits of solar power, even if installing solar on-site is not an option. Subscribers receive power generated by the community solar array that is less expensive than power generated from conventional fossil fuel power plants. Community Solar requires no capital investment, equipment installation, or ongoing maintenance obligations.

1 Save up to 20% on your company's electricity bill

Subscribe to a local community solar farm through the SBAC Clean Energy Procurement program and save up to 20% on your electric bill.

2 Raise Money for the SBAC

For every CEP enrollment, a donation of up to \$250 will be made to the SBAC to support the continued fight for policies that foster a healthier small business environment.

3 Support Renewable Energy Development in Illinois
