

New Baptist Hospital Campus Construction Update

August 2023

Amenities

Comfort and convenience for patients, their families and our team members have been important priorities from the first time we sat down to discuss the design of the new Baptist Hospital campus that opens next month. Let's take a look at a few of the amenities that will create a pleasant, healing environment for all who visit our campus.

All across the expansive grounds, sidewalks meander among generations-old heritage oak trees and beautiful landscaping featuring native plants. Seating areas provide tranquil spaces to relax and enjoy a stress-reducing outdoor respite. The healing benefits of natural sunlight are brought indoors with floor-to-ceiling windows throughout the building. Artwork created by team members and local artists highlights the interior to offer visual solace as well.

Patient rooms in the new hospital are spacious to comfortably accommodate family members and visitors. Each room, including critical care units, is furnished with a sleeper sofa and computer station for family members so that patients can benefit from the comfort provided by the presence of loved ones. A patient engagement system conveniently delivered through the TV includes nurse information, call button, entertainment and meal ordering. The TV monitor also includes an interactive digital eCareBoard that interfaces with the patient's electronic health record, displays patient specific data and provides patient education videos and safety information. For added comfort, patients can control the lighting and temperature of their room.

Beyond the patient care areas, more amenities enhance a visit to the campus, including a bistro with pizza oven, Panera Bread café, a retail pharmacy offering bedside delivery of prescription medication, directional signage to assist with wayfinding and free valet parking services. There's even a conference center that will be available to the public for special events and educational opportunities. Please visit

ebaptisthealthcare.org to learn more about the features and services offered at our new campus.
