Get Chemical with the MESS Hall in February

Throughout the month of February, visitors will explore many facets of chemistry during our special theme “Let’s Get Chemical”. Chemistry is the study of anything that has matter, everything that matters, and is often called the central science since it links physics to biology, earth science to environmental science. Featured activities will include candy chromatography, seaweed worms, and pipette art. Every Saturday afternoon MESS Hall staff will guide visitors to electroplate their own coins. From marvelous metals to fabulous fabrics to edible emulsions, visitors will discover how chemical properties are part of their everyday life.

The Pensacola MESS Hall will be open Tuesday through Friday, 12 PM - 5 PM, and Saturdays, 10 AM - 5 PM for the entire month of February. Admission is \$15 per person for everyone ages 3 and up.

ABOUT THE PENSACOLA MESS HALL

Founded in 2012 and located at 418 E. Wright St in Downtown Pensacola, the Pensacola MESS Hall is not a typical science museum. It's all hands-on science. Visitors enjoy exploring math, engineering, science, and stuff with an ever-changing menu of mess kits, activities and exhibits. For more information about the MESS Hall, visit pensacolamesshall.org.
