ABOUT BEAR WALKER

Renowned craftsman Bear Walker is a famed skateboard maker who has been featured in HypeBeast, The New York Times, INC 5000, and Forbes to name a few. Walker has made a name in the collectible industry with his highly functional art, now expanding beyond just skateboards to premium electric guitars. Being a lifelong pop culture/comics/movie fan, Walker brings nostalgia and expertise to his collections so that products feel more like an experience than an item on a shelf. With sold out collections in Japan, London, and SDCC, even the Certificates of Authenticity have become sought after, now being accepted and graded by PSA. Walkers portfolio of collaborations continue to grow, including the likes of Pokémon, Marvel, Godzilla, TMNT, and now expanding to South Park for his latest collection of limited-edition pieces.

BEAR WALKER INDUSTRIES

Bear Walker Industries began in 2017 and has been manufacturing high end, pop culture skateboards for the last 7 years. In the last two years we have branched out into making custom guitars and street decks as well as apparel. Our carved out boards and guitars are made locally in Daphne, AL and our apparel and street decks are sourced and manufactured within the USA. The latest edition to our company is the newly open storefront located in Pensacola, FL. Bear Walker Skateshop will carry all of our carved out stock boards, limited edition street decks, apparel and custom guitars.

THE DIRE

The DIRE, an original Bear Walker stock board. This board was originally created in 2019, inspired by the dire wolf. The dire wolf is known as one of the most famous prehistoric carnivores in North America. The dire wolf is now extinct, but it was found that their ancestors emerged some 5.7 million years ago. Each board is carved out with a CNC machine, routed, hand filed, sanded, branded, hand painted, airbrushed, and finally clear coated. As the third version of the DIRE, the design features custom artwork by Rupert Gruber carved into our patented Underbite grip.

THE GAMER

The GAMER, an original Bear Walker stock board. This board design originated in 2018 and was inspired by Bear's love for gaming and pop-culture. The second iteration of this design features elements of a gaming controller with the details and background airbrushed by our expert artists. The solid paint on the buttons are expertly hand painted by our surface paint team. All boards are carved out with a CNC machine then hand filed and sanded. Each boards design is carved into our patented Underbite grip.
