UNDER \$50K

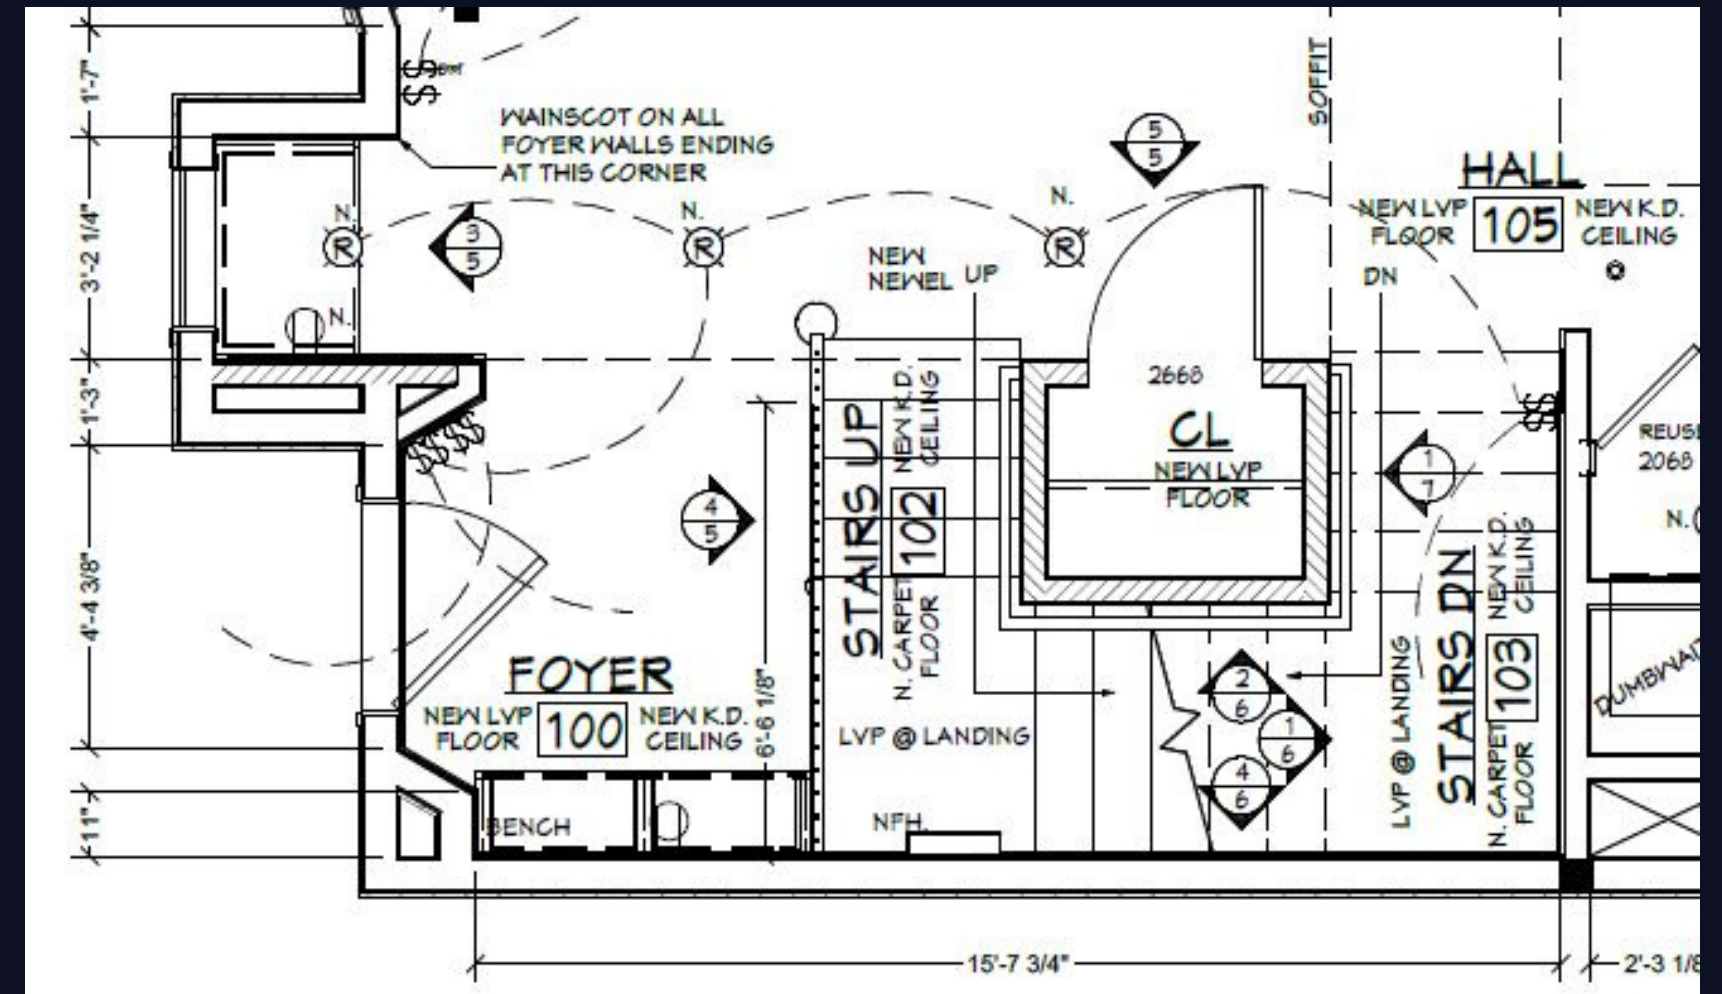

GRANDE ENTRANCE

This dated 90's condo was screaming for a grand entrance. The homeowner wanted to leave friends & family speechless and wanting more upon entering the home. Our team was challenged with having to leave existing structural elements as is so we designed a showcase of millwork with shoe storage, a drop zone and a hidden coat closet. The wainscot encapsulates the staircase leading you up to the second level hallway with wall sconces and new foyer light.

OUR VISION

Taking pride in the details really helped bring this vision to life. Stair location and all existing walls needed to remain so we worked around the constraints and created a unique, functional and beautiful space for the homeowner.
