

REQUESTED ACTION: Expand and strengthen federal incentives supporting advanced heavy-duty vehicles built by U.S. manufacturers.

Expanding programs like DERA and the Commercial Clean Vehicle Credit (45W) helps businesses invest in next-generation vehicles

HOW INCENTIVES FOR ADVANCED HEAVY-DUTY VEHICLES:

SUPPORT U.S. MANUFACTURING	SUPPORT U.S. BUSINESSES	SUPPORT U.S. RESIDENTS
<ul style="list-style-type: none"> ✓ Create predictable demand for U.S. vehicle production ✓ Allow American companies to lead globally by giving them the support to advance cutting-edge technologies 	<ul style="list-style-type: none"> ✓ Address workforce shortages ✓ Provide opportunities for small businesses to access advanced technology 	<ul style="list-style-type: none"> ✓ Support economic growth by reducing regulatory mandates ✓ Advance federal ozone standards

“There is a strong case to be made for the development of autonomous off-road equipment for the construction and mining industries. When this technology and its affordability reach a critical tipping point, it will become an important element of all construction and mining companies’ fleet planning.”

— John Lane,
Director of Sustainability
and Environmental Compliance, Teichert
