

## Support the Campaign Fund Empower our Advocacy

Minnesota's upcoming legislative session will feature narrow political majorities, election-year pressures, a projected \$3 billion budget deficit, and uncertainty around executive priorities – increasing the stakes for decisions affecting the consulting engineering industry. In this environment, it's critical that engineers are heard early and clearly in policy and budget discussions.

ACEC Minnesota will be engaged throughout the session, but that work depends on member support. Your contribution to the ACEC Minnesota Campaign Fund drives our efforts build relationships with policymakers, elevate the perspective of our industry, and ensure that decisions shaping Minnesota's future are informed by the expertise only engineers can provide.

The ACEC Minnesota Campaign Fund supports the engineering industry's legislative priorities by enabling members to build relationships with key policymakers and ensure our industry's concerns are clearly understood and considered as lawmakers address these issues during the 2026 Legislative Session:

- Capital investment and bonding decisions
- Agency scrutiny affecting project delivery
- Permitting and regulatory process changes
- Procurement and contracting requirements
- Workforce and credentialing requirements
- Changes in business taxation
