The Innovation Center at Saratoga Announces Fall Schedule and Exciting New Community Events

Malta, NY – The Innovation Center at Saratoga, Inc. is pleased to announce the launch of its Fall 2025 schedule of classes, offering a wide range of engaging, hands-on learning opportunities for all ages. From weaving to stained glass to photography to electronics to self-publishing and more, the lineup provides something for everyone in the community. In addition to classes, we are thrilled to introduce three new events this fall:

STEM Saturday: Everything 3D Printing

Date: Saturday, October 18 from 11am to 4pm

Curious about the future of making and innovation? Join us for an interactive day exploring the world of 3D printing. Participants can attend demonstrations, learn about design software, and discover how 3D printing can be incorporated into their favorite hobbies. Do you have a 3D printer at home that you need help with? Bring it in and we'll see if we can help you diagnose the problems.

Repair Café — Hosted together with Sustainable Saratoga

Date: Saturday, October 25 from 1pm to 4pm

Bring your broken items and learn how to fix them instead of throwing them away. Volunteer “fixers” will help participants repair textiles, electrical items, jewelry, clothing, computers, and more. This collaboration with Sustainable Saratoga highlights our joint commitment to reducing waste and promoting sustainability.

Holiday Marketplace

Date: Saturday, December 6 from 11am to 5pm

Celebrate the season while supporting local makers and artisans at our festive Holiday Marketplace. Discover unique, handcrafted gifts, enjoy seasonal music, and connect with the community in a warm holiday atmosphere.

“Fall is about fresh starts and new opportunities,” said Beth Moeller, Board President of The Innovation Center at Saratoga. “We’re proud not only to offer diverse classes but also to partner with the community on innovative events that inspire creativity, sustainability, and local pride.”

The full schedule of classes and event details can be found at <https://innovationcentersaratoga.org>. Registration is now open, and early sign-ups are encouraged.

The Innovation Center at Saratoga, Inc. is a non-profit 501(c)(3) collaborative maker space where artists, entrepreneurs, and community members come together to learn, create, and innovate. More information can be found at <https://innovationcentersaratoga.org>.
