

As a sitting member of the committee for the Oxford University Society of NSW (OUSNSW) since 2024, my responsibilities are to offer members an environment for continual career and personal development, opportunities to engage in dialogue with leaders, academics and industry professionals on global business issues as well as those pertinent to their local chapter. I work to provide a vital connection between members and the University of Oxford, supporting current and prospective students, connecting alumni through shared interests and to stay connected and in touch with the University. I have served as Treasurer on the Executive Committee of the Macquarie Ice Skating Club (MISC) in Sydney, Australia between the period April 2014 and March 2016 to foster good sportsmanship. I actively supported the sport of figure skating, and its members who are state and national representatives, and many skaters who compete at state, national, and international levels. As the Treasurer, I was able to contribute my finance and accounting skills and my commercial experience to the role, for the benefit of the members and the sport. I also had the opportunity to provide an independent point of view in the deliberations of the committee. Both organisations (OUSNSW and MISC) operate as Not-for-Profit organisations and are regulated by the governing body of Ice-Skating Australia (ISA), the Australian Charities and Not for Profit Commission (ACNC) and The Australian Tax Office (ATO). My areas of expertise include Leadership, Finance and Technology. I keenly follow trends in emerging technologies and its impact on fundamental accounting and finance business processes. I have a strong background in governance, finance and stakeholder engagement, with leadership experience supporting executive level decision making and transformation initiatives. I am enrolled in the Masters in Data Analytics at the University of Sydney from February 2024 where I have achieved an average pass rate of 76%. I aim to enter the PhD program at the University of Sydney. I hold a Postgraduate Diploma in Organisational Leadership (PGDipOL) from the University of Oxford, a Graduate Certificate in Business Administration (MBA) from the University of Technology Sydney (UTS) and a Diploma in Project Management from the University of New England in New South Wales (UNE), Australia. I have listed my membership of other professional bodies in my resume, for example, DAMA, the Global Data Management Community. The tools of my trade are Microsoft Project Suite (Excel, Word PPT etc) and ERP systems like Oracle, SAP and Sage and analytical software like Power BI, R-Suite, Python and SQL. My project management and financial accounting experience has helped me build the skills required to develop policies and frameworks based on accounting standards (AASB and GAAP) and frameworks using PMM and SOx principles. I have worked across various sectors and multi-disciplinary organisations, including government, aviation, education, and print media. I have led the finance and PMO functions of major airlines and ground handling providers in Australia, working on large programmes of work (Oracle Financials and Sage) and divestments and using PMM methodology as prescribed by PMBOK.
