Budget Clarifications

\$\$ from Year 1 can carry over to Year 2

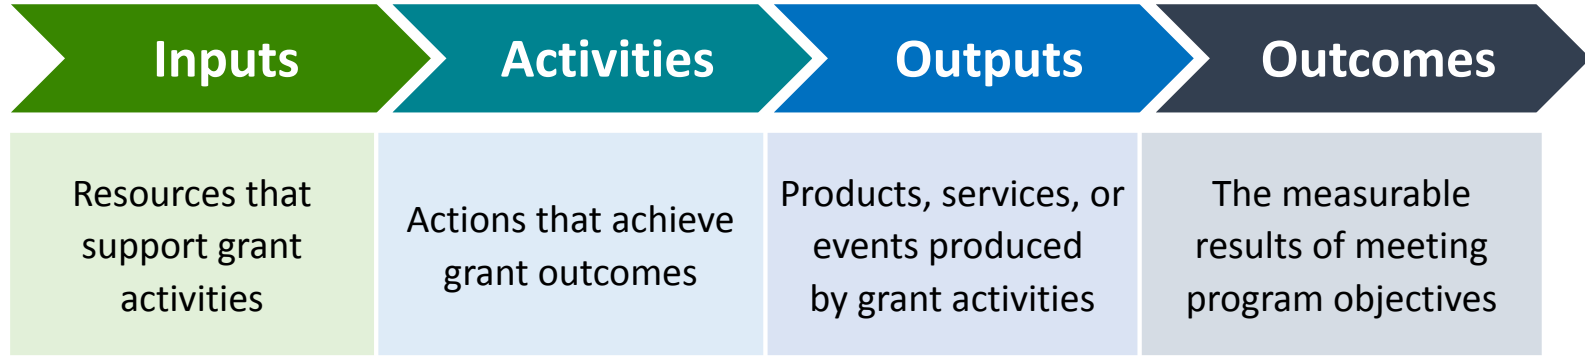

—
Backlogged Salaries

Before starting on your logic model - consider the following:

- Why do we want to do this subgrant?
 - How does it fit the bigger picture of our community?
 - What will it take to do it – people, information, infrastructure?
 - What's in the way and how do we plan to address obstacles?
 - What are the actual tasks of work we will carry out?
 - How will we identify and document that the work has been done?
 - How will we measure the results of that work?
 - Can we relate those results to the reasons we did the project?
-

More on the Basic Components

External Factors

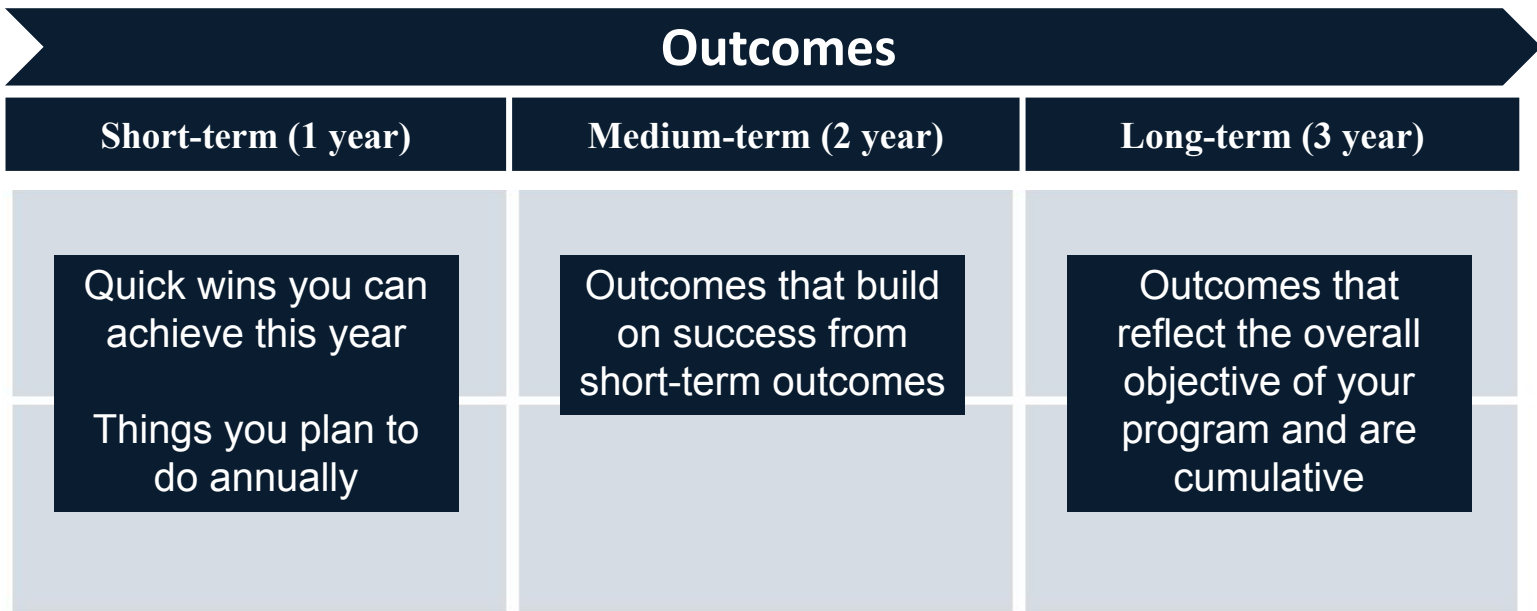

Contextual conditions that may impact your grant

Assumptions

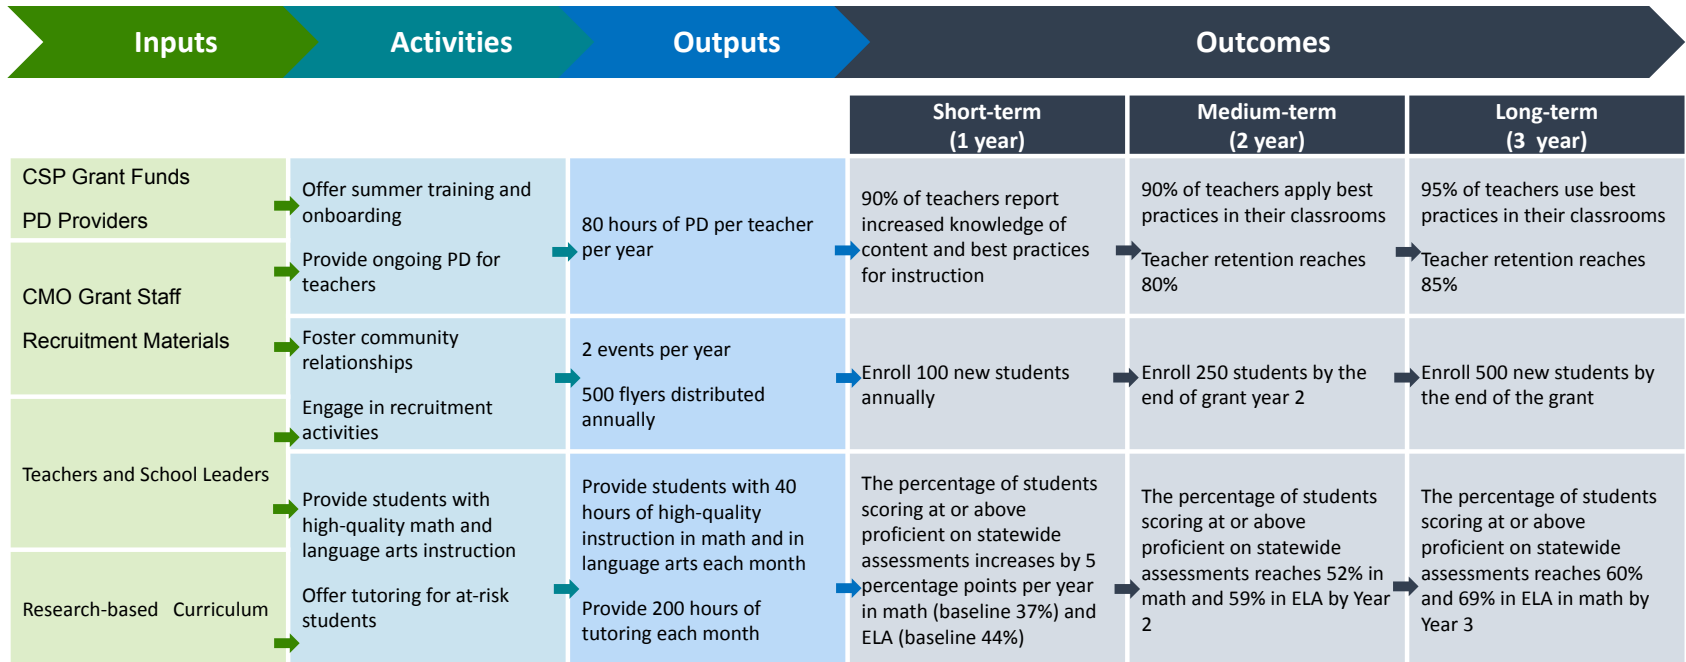

Beliefs that may impact your grant

Definitions of Outcomes

What are the specific, measurable goals you plan to achieve?

Example of a Logic Model

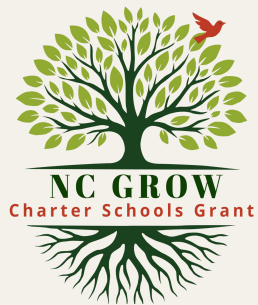

External Factors

- Supportive charter school state laws
- Long wait lists for charter school admission
- Strong community support for charter schools

Assumptions

- Capacity to replicate new schools at higher grade levels
- Parents have shared interest in a path to remain with a charter school through 12th grade
- Current community partnerships are scheduled to continue
