

# Pathway to a More Sustainable Clinic

## Core

### CONVENE

Start your clinic sustainability team. Be inclusive and support each other.

### ASSESS

Gather data on the ecological footprint of your clinic.

### REFLECT

Review information and identify priorities to finalize a series of team goals.

### PLAN

Develop an implementation strategy with milestones and deliverables.

## Clinic

### ENERGY

Use less energy and obtain as much as possible from renewable sources.

### WASTE

Review your waste management protocols, including pharmaceuticals.

### WATER

Reduce your water use through efficiencies in equipment and actions.

### PROCUREMENT

Choose, and request of suppliers, environmentally and socially conscious products.

### TRANSPORTATION

Promote low emission transportation and reduce transport needs.

## Community

### HEALTH

Expand access to care and preventive medicine for animals in need.

### STORIES

Speak openly of your sustainability journey and why you care.

### CONNECTIONS

Engage with professional networks, allied health sectors, and beyond.

### POLICIES

Advocate for animal health, welfare, and sustainability to decision makers.

### NATURE

Conserve the natural ecosystems essential for our collective well-being.
