11:30 AM Registration & Lunch Buffet Fairway Ballroom Foyer

12:00 – 1:50 PM Tuesday, November 11<sup>th</sup> Pre-Conference Lunch Symposium Fairway Ballroom

## TAVR-in-TAVR and Lifetime Management of Aortic Stenosis

This symposium is supported by an educational grant in accordance with the ACCME Standards for Integrity and Independence in Accredited Continuing Education and is included in the total CME hours for the course.

#### Moderator:

Curtis T. Stinis, MD

12:00 - 12:05 PM

**Welcome & Introduction** 

Curtiss T. Stinis, MD

12:05 - 12:30 PM

TAVR Durability- What Does the Data Show?

*Joseph Aragon, MD* 12:30 – 12:40 PM

Discussion

12:40 - 1:05 PM

**Redo TAVR: A Surgeon's Perspective** 

Daniel Logsdon, MD 1:05 – 1:15 PM

Discussion

1:15 - 1:40 PM

TAVR-in-TAVR: Important Concepts You Need to Know

Curtiss T. Stinis, MD 1:40 – 1:50 PM

Discussion

1:50 - 2:00 PM

Break

#### 2:00 - 3:00 PM

## Tuesday, November 11th Pre-Conference Symposium

## Fairway Ballroom

# CathWorks FFRangio: The New Era in Optimizing Clinical Decision-Making

Sponsored by CathWorks/Medtronic This content is not CME/MOC accredited

2:00 - 2:12 PM

The Need for Comprehensive Physiology to Guide Treatment and Optimize Outcomes *Morton Kern, MD* 

2:12 - 2:24 PM

The New Era in Physiology - CathWorks FFRangio: Wire-Free, Drug-Free, Multi-Vessel Matthew J. Price, MD

2:24 - 2:36 PM

**Integrating CathWorks FFRangio into Daily Clinical Practice** 

Evan Shlofmitz, DO

2:36 - 3:00 PM

Discussion of Current Applications, Clinical Data, and Future Roadmap

Moderator: Morton Kern, MD

Discussants: Matthew J. Price, MD, Evan Shlofmitz, DO

3:00 - 3:15 PM

Break

## The Benefits of CT-Guided PCI for Calcium Modification

Sponsored by Heartflow & Shockwave Medical This content is not CME/MOC accredited

Advances in coronary CT angiography (CCTA) with HeartFlow are transforming the way we approach percutaneous coronary intervention (PCI). This session will highlight how CT-derived insights can guide procedural strategy, optimize patient selection, and enhance outcomes in complex cases. Participants will learn to recognize when calcium modification is required and explore the role of intravascular lithotripsy (IVL) in achieving optimal results. Through real-world case examples, we will compare traditional angiographic planning with CT-guided approaches, underscoring the value of integrating imaging and functional data into decision-making for contemporary PCI practice.
