

Worldwide distribution suffers a **-8.5%** hit to revenues in 2023 – decline is broad-based across distributors and markets

Updated unique research on the Top Worldwide Authorized Distributors

This report is the latest update of the true, original “Top 50 Worldwide Authorized Distributors” research that was published for the first-time in 2021. Once again, the goal of the research conducted to develop the data presented in this article is to include the major authorized distributors from

all three regions. Given the dominating presence of Asia as a distribution market, a second goal was to provide total revenue data for the top electronics component country markets in Asia. According to the research presented in this article, Asia saw its share of the worldwide market of the Top 50 authorized distributors slip once again

as it contracted from 70.8% in 2022 to 68.9% in 2023. The Americas and EMEA distribution markets both expanded their share of the worldwide market with EMEA growing by 1.5% and Americas by 0.3% each to account for 13.2% and 16.0% market share, respectively. Still, 36 out of the top 50 authorized distributors are

Dale Ford - ECIA chief analyst

headquartered in Asia and account for 56.8% of 2023 distribution revenues in this analysis.

The publication of this update is a continuation of a plan to develop additional research on the electronic component distribution markets. ECIA provides its members and the industry with a wide range of highly valuable research including detailed sizing of component total available market (TAM) and distribution total available market (DTAM) for the Americas, EMEA and Asia for selected key categories. In addition, it provides data on the Americas Top 50 Authorized Distributors, component lead times, bookings trends, electronics component industry sentiment, best practices for key distribution activities such as environmental compliance, cybersecurity, China tariff avoidance and recovery, paperless certificate of compliance, and much more.

The top 50 worldwide authorized distributor research methodology and results

As a standard note regarding the publication of the Top 50 worldwide authorized distributors, the task of identifying and sizing the top authorized distributors around the world presents significant challenges beyond the research developed for the Americas Authorized Distributor data. For example, participation in surveys by industry companies is a well understood practice (if not always supported) by Americas and European companies. The same is not true in Asia where personal relationships and communication are key to gathering helpful information. Surveys have a very low participation rate in Asia. In addition, most companies headquartered in China

are private and not easily accessible for communication. However, some major players have gone public in recent years which sheds valuable light on their activities and revenues. Given these and other issues, the methodology pursued for this research needs to be explained briefly.

1. Surveys were used to gather information for this research and every effort was made to identify contacts at all companies to invite participation in the survey. As anticipated, the level of participation by companies headquartered in Asia was low. However, a number of companies headquartered in Asia continued to participate in the research.

2. To expand the data captured in this report, extensive research of published financial data for all public companies was pursued. A number of private companies also provide extremely helpful top-level financial data.

3. Input from major manufacturers and distributors was solicited to both identify top distributors and provide guidance on the revenues of private companies. Roughly 100 companies were identified for consideration in the top 50. Companies were excluded both for falling below the top 50 and because they were engaged as a broker instead of authorized distribution.

Continue on page 32 >

4. Finally, web-based secondary research was a source of additional data that supported modeling and analysis used to create estimates in areas where surveys or published data was not available.

The tables and figures presented in this report have been created based on the methodology described above.

Distributors faced an extra challenging year as market and economic headwinds pushed the distribution market into negative growth territory. China was a particular challenge with a substantial impact given its 42% share of the global distribution market. China distribution market revenues declined by double digits falling 16.8% in 2023. Taiwan, Malaysia/Singapore, and Japan also experienced declining revenue of 5.3%,

0.2%, and 1.5%, respectively. On the bright side, emerging markets in Vietnam and India grew by double digits at 17.2% and 13.3%, respectively. South Korea also achieved growth of 2.1%. The small Australia/New Zealand market experienced a double-digit decline. Overall, Asia saw its distribution revenue take a hit of -10.9% in 2023. Americas authorized distribution revenue also declined in 2023 falling 6.8% in 2023. The European market is the only region to achieve growth in 2023 as it expanded by 2.4%.

Total worldwide revenue for the Top 50 authorized distributors fell from \$194.6 B in 2022 to \$178.0 B in 2023, a drop of \$16.6 billion. Only eleven of the top 50 distributors were able to grow their revenue in 2023. The highest growth in 2023 was achieved by Kanematsu at 19.4% followed by FDH

Electronics with growth of 19.2%. RS Group, DAC/Heilind, and Marubun were the only other distributors to achieve double digit growth in 2023. The biggest hit to growth was suffered by Smart-Core Holdings with sales slumping by -43.3% in 2023. On a worldwide basis, there was no meaningful change in the mix of revenues by component type. Semiconductors sustained their commanding share of the market at 78.6% Every end-market for distribution saw a contraction in 2023 with Mobile Communication Devices and Consumer Electronics falling the farthest with declines of -15.6% and -19.3% respectively in 2023. By virtue of limiting its decline in revenue to only -3.3%, Industrial Automation replaced Mobile Communication Devices as the largest distribution end-market in 2023 driving \$34.2B in revenue.

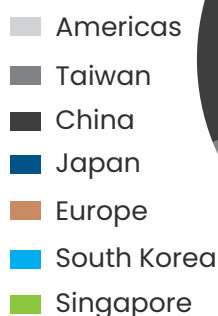

Emerging markets in Vietnam and India grew by double digits at 17.2% and 13.3%, respectively

2022

Total Revenue = \$194.6 B

2023

Total Revenue = \$178.0 B

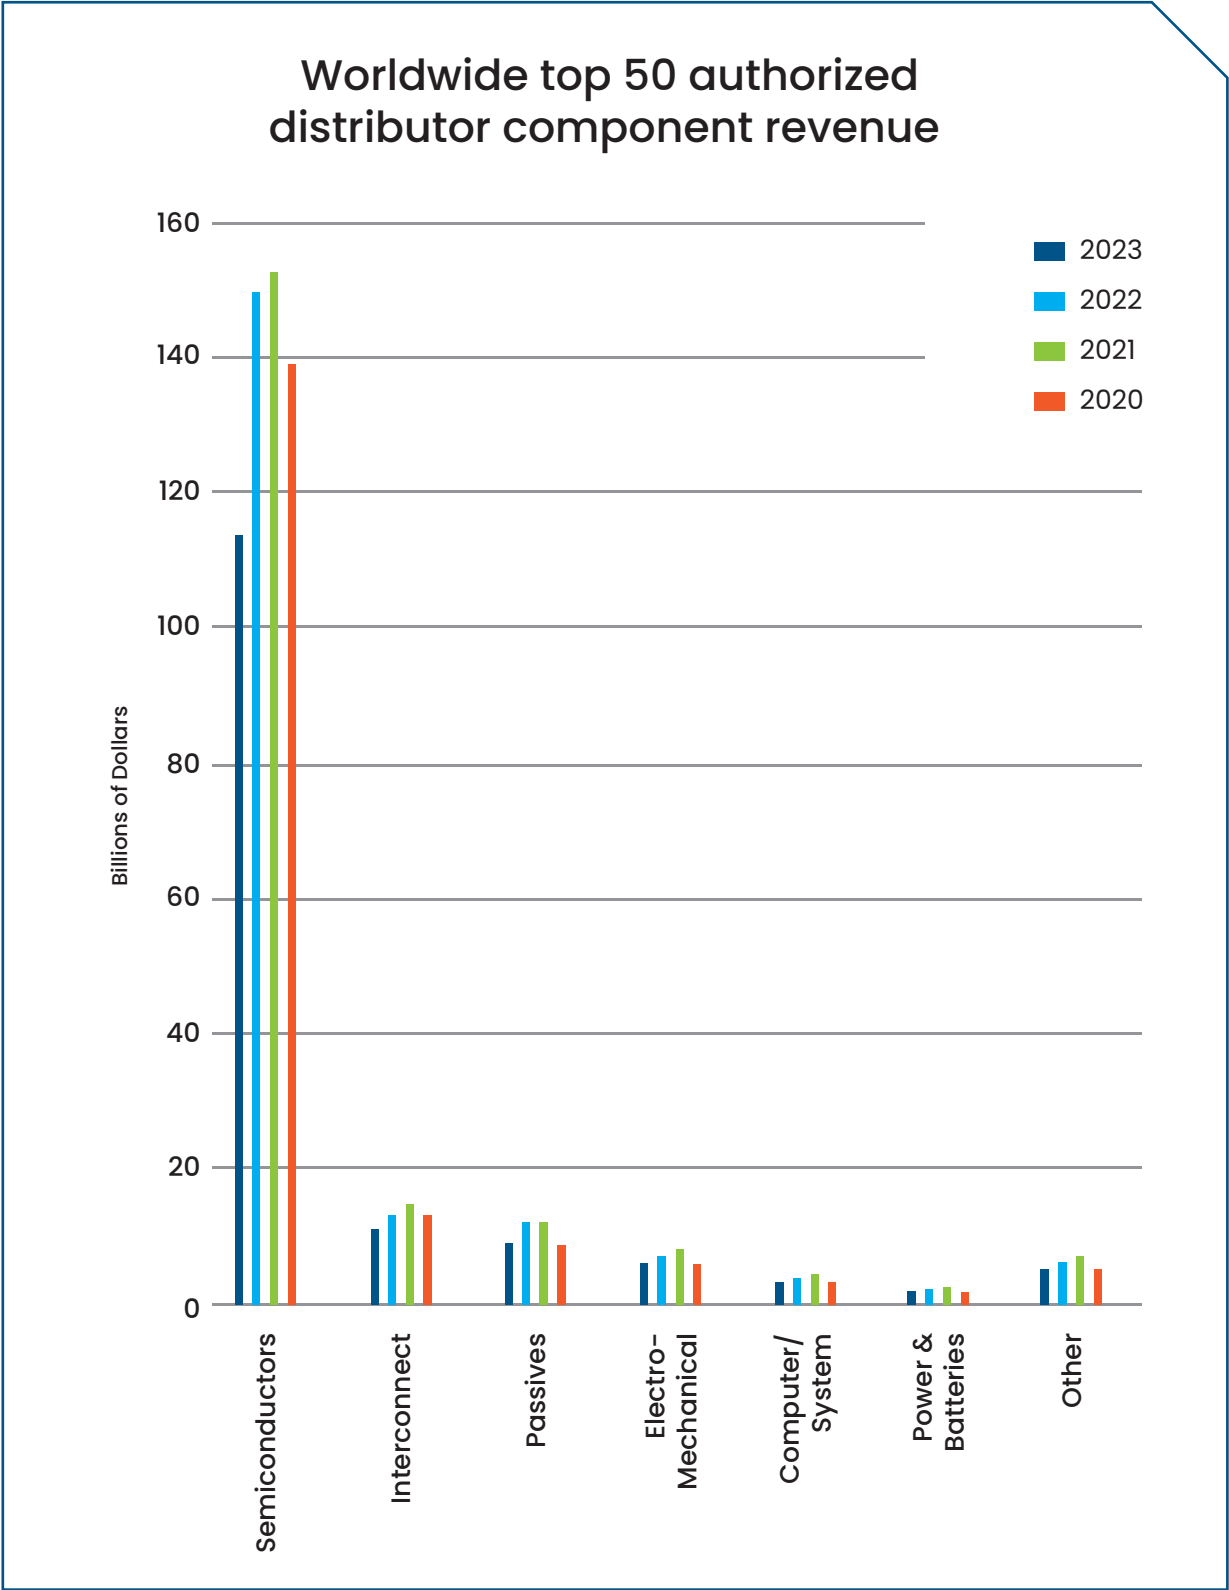

- Top 5
- Rank 6 to 10
- Rank 11 to 20
- Rank 21 to 30
- Rank 31 to 40
- Rank 41 to 50

Rank	Revenue	Share	Growth
Top 5	98,583.1	55.4%	-5.3%
6 to 10	23,630.2	13.3%	-19.4%
11 to 20	28,677.3	16.1%	-5.3%
21 to 30	13,842.0	7.8%	-10.1%
31 to 40	8,731.4	4.9%	-15.1%
41 to 50	4,566.3	2.6%	-11.7%
TOTAL	178,030.2	100.0%	-8.5%

The top five worldwide distributors achieved a minor increase in their share of total worldwide revenues among the Top 50 to 55.4%. The top five also managed to limit their decline in 2023 revenues compared to other groups with a drop of 5.3%. The strongest performance among the Top 5 came from Macnica with an increase of 4.0%. Avnet captured the crown as the largest authorized distributor in 2023 with \$25.58 B in revenue, passing Arrow Electronics with \$25.42

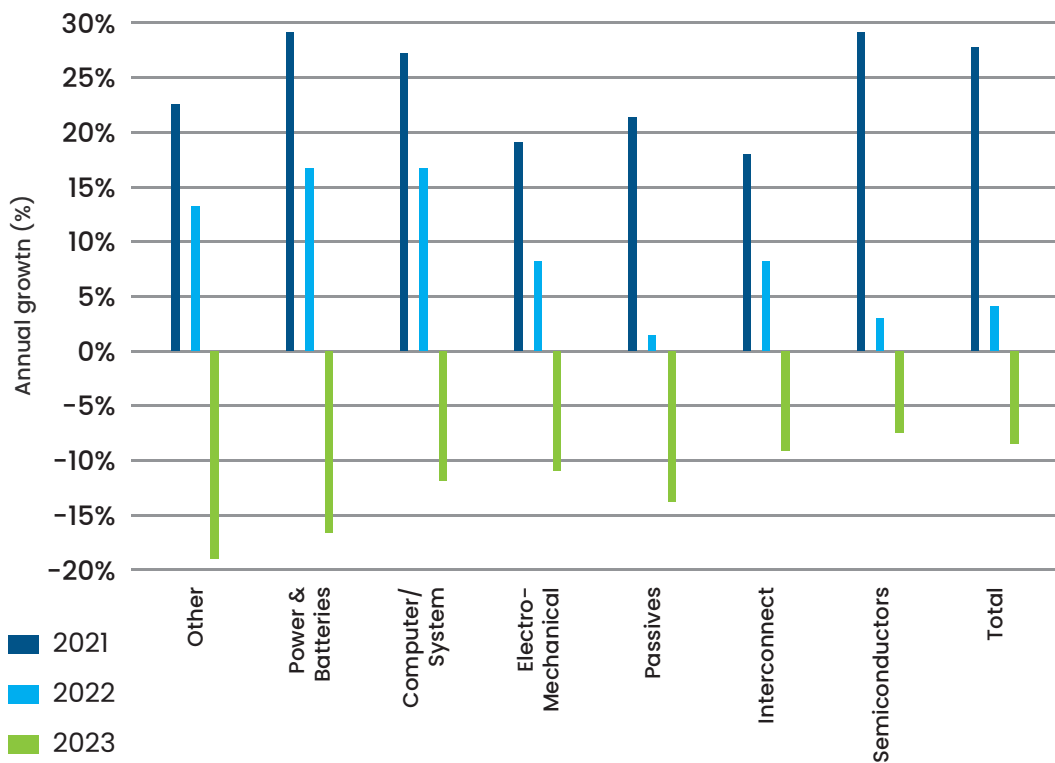

B in revenue. A close race! There are a notable number of electronic component distributors with significant revenues that did not achieve ranking in the Top 50. If it is assumed that the Top 50 account for 90% of all worldwide authorized distribution revenue, the global electronic component authorized distributor market would be estimated at \$198 B in 2023.

Top 50 worldwide authorized distributors

The final tables of this report present the complete list of Top 50 Worldwide Authorized Distributors for 2023 along with Top 10 rankings for individual component categories and top sales growth. Revenues for the Top 50 distributors are presented for eight Asian countries that drive a large share of global electronics equipment production: Mainland China/Hong Kong, Taiwan, Japan, Malaysia/Singapore, India, South Korea, Vietnam, and Australia/New Zealand. Continuing its historic dominance, China accounted for 60.3% of

2023 revenues. However, this is a notable decline from the 64.6% share it commanded in 2022. The next largest country markets are Taiwan with 12.2% share and Japan with 11.0% share in 2023. The size of the emerging India and Vietnam distribution markets is a common question. Based on the research for this report, the top 50 distributors account for \$4.3 B in India and \$3.1 B in Vietnam in 2023, a significant jump in revenues compared to 2022.

Average exchange rates used to convert to a common US dollar basis

Currency	2020	2021	2022	2023
Chinese Yuan (¥)	6.898	6.452	6.725	7.067
Hong Kong Dollar (HK\$)	7.756	7.770	7.831	7.819
Taiwan Dollar (NT\$)	29.454	27.916	29.762	31.133
Japanese Yen (¥)	106.78	109.78	131.37	140.52
Korean Won (₩)	1,179.2	1,145.1	1,292.2	1,305.4

*Type of Distributor: 1 = Broadline; 2 = Specialized;
3 = High Service/E-Catalog; 4 = Limited Line

(1) Avnet includes Farnell

(2) Nexty Electronics includes Toyota Tsusho and Tomen

(3) Restar Group includes UKC Electronics and Restar Electronics

(4) Best of Best Holdings includes Honestar & AsiaCom

Technology Alliance

(5) BJG+Electro Enterprises
