

INTERNATIONAL FEDERATION OF HEALTHCARE ENGINEERING

IFHE 2026 World Congress

Agenda

A preview of the global gathering for healthcare facilities, engineering, and design

DATES	October 17–20, 2026
LOCATION	New Orleans, Louisiana, USA
HOSTED ALONGSIDE	Healthcare Design Conference + Expo AMFP Symposium

Compiled by the IFHE 2026 Education Committee · August 2026

WELCOME

Welcome to the World Congress

IFHE · WALT VERNON, PRESIDENT

A Global Conversation, Anchored in New Orleans

On behalf of the International Federation of Healthcare Engineering, it is my privilege to invite you to the 2026 IFHE World Congress in New Orleans. This is the one moment, every two years, when the engineers, facility leaders, and designers who quietly carry the weight of healthcare delivery in every country come together to learn from one another and shape the future of care.

In 2026 we are co-located with the Healthcare Design Conference and the AMFP Symposium — bringing owners, designers, and operators into the same room. Come ready to contribute. Your voice belongs in these conversations.

Walt Vernon · President, International Federation of Healthcare Engineering

AMFP · BOB FELDBAUER, PRESIDENT

Where Owners and Operators Meet the World

On behalf of the Association of Medical Facility Professionals, I am thrilled to welcome our IFHE colleagues and the global healthcare facilities community to New Orleans. AMFP members are owners and operators — we live with the consequences of every design decision, every system that does or doesn't perform when it matters. That perspective is exactly what makes the World Congress so valuable for us, and for our international partners.

Sit at a table where you don't know anyone. Trade a business card with someone whose accent isn't yours. The relationships you build this week pay dividends for the next decade.

Bob Feldbauer · President, Association of Medical Facility Professionals

EMERALD · JENNIFER SILVIS

A Convening Designed to Move Our Industry Forward

On behalf of Emerald and the Healthcare Design Conference + Expo team, it is my privilege to welcome the IFHE World Congress and AMFP Symposium to New Orleans. Co-locating these three communities is a deliberate commitment to reshape how our industry learns, connects, and advances.

You will find shared keynotes, joint sessions, an expanded Expo, and the kind of social moments that only New Orleans can deliver. Come for what you need; leave with what you didn't expect.

Jennifer Silvis · Emerald · Healthcare Design Conference + Expo

ABOUT THE CONFERENCE

The 2026 IFHE World Congress

A preview of the global gathering for healthcare facilities, engineering, and design

The IFHE World Congress is the international gathering of professionals who plan, design, engineer, operate, and maintain healthcare facilities worldwide. Held every two years, it brings federation member societies, sponsors, partners, and delegates together to share research, exchange practice, and shape the global standards that protect patients, staff, and visitors in care settings around the world.

The 2026 Congress is hosted in New Orleans in deliberate co-location with the Healthcare Design Conference + Expo and the AMFP Symposium — a single week of cross-disciplinary, cross-border learning where owners, operators, designers, and engineers share keynotes, panels, an Expo floor, and a full social program.

Dates, venue, and location

Sunday, October 18 through Tuesday, October 20, 2026, in New Orleans, Louisiana, USA. Co-located with HCD and AMFP at a single host venue. Served by Louis Armstrong New Orleans International Airport (MSY).

Who should attend

- Healthcare facility directors, plant operations leaders, and chief engineers
- Owners, capital planning leaders, and owners' representatives
- Architects, engineers, and design-build partners delivering healthcare infrastructure worldwide
- National healthcare-engineering society leaders, IFHE delegates, researchers, educators, and emerging professionals

What's included with registration

- All Sunday–Tuesday IFHE keynotes, breakout sessions, and the formal Opening Ceremony
- Access to the shared Expo Hall and the IFHE Exchange Pavilion in the HCD Expo Hall
- Sunday IFHE-funded Networking Lunch, Monday and Tuesday Expo Hall lunches, daily breakfasts
- HCD Gallery Reception and HCD Welcome Reception
- Guided IFHE Hospital Tour (Tuesday, capacity limited) and International Building Awards & Closing Events

Registration

Registration is now open through the official IFHE 2026 World Congress (HCD portal).

Event Support from IFHE Ambassadors

IFHE Ambassadors help attendees and speakers navigate the World Congress and New Orleans — assisting with translations, directions to sessions, booths, and social events. For translation support before the event, join the IFHE 2026 WhatsApp group via Chief Ambassador Paola Tocci at +1 917-670-7152. During the event, Ambassadors are at the Ernest N. Morial Convention Center: 1st floor registration desk, 2nd floor information desk, and the IFHE Pavilion.

SCHEDULE AT A GLANCE

The Congress at a Glance

Sunday through Tuesday · A consolidated view of every session, meal, and signature event of the World Congress program. Refer to the day-by-day detail that follows for speakers and session descriptions.

DAY	TIME	CATEGORY	ACTIVITY	LOCATION
Sun, Oct 18	7:00 – 8:00 a.m.	Meal	Networking Breakfast	Ballroom Lobby
	8:00 – 9:15 a.m.	Plenary Keynote	Welcome + Opening Keynote (All Badges)	Great Hall
	10:00 – 11:00 a.m.	Opening Ceremony	2026 IFHE World Congress Opening Ceremony	IFHE Stage
	11:00 – 11:30 a.m.	Session	One Vision, Many Perspectives: Leading Complex Teams Toward Collective Success	IFHE Stage
	11:30 a.m. – 12:00 p.m.	Session	AI and the Future of the Built Environment: Strategy, Transformation, and What Comes Next	IFHE Stage
	12:00 – 1:00 p.m.	Meal	Networking Lunch (IFHE Badges)	IFHE Hall
	1:00 – 1:30 p.m.	Session	Flexibility, Standardization, and the Cost of Customization	IFHE Stage
	1:30 – 2:00 p.m.	Session	From Strategy to Performance: Executive Strategies for Operational Readiness	IFHE Stage

Sunday, October 18, 2026

7:00 – 8:00 a.m.

NETWORKING

All Attendees (IFHE, AMFP, and HCD)

Networking Breakfast

An informal breakfast welcoming IFHE, HCD, and AMFP participants to New Orleans, with time to reconnect with colleagues and meet international delegates before the opening sessions begin.

LOCATION

Ballroom Lobby

8:00 – 9:15 a.m.

PLENARY KEYNOTE

All Attendees (IFHE, AMFP, and HCD)

Welcome + Opening Keynote (All Badges)

Joint opening keynote for HCD, AMFP, and IFHE that frames the week's themes, highlights key challenges for healthcare facilities globally, and sets expectations for how design, operations, and leadership intersect throughout the World Congress.

SPEAKER

TBD

LOCATION

Great Hall

10:00 – 11:00 a.m.

CEREMONY

IFHE Attendees

2026 IFHE World Congress Opening Ceremony

A formal opening ceremony for the 2026 IFHE World Congress featuring federation leaders, host country representatives, and international delegates. The program includes welcome remarks, recognition of member societies, and a preview of the clinical, technical, and strategic topics that anchor this year's congress.

SPEAKERS

IFHE Federation Leaders

Host Country Representatives

LOCATION

IFHE Stage

11:00 – 11:30 a.m.

SESSION

IFHE Attendees

One Vision, Many Perspectives: Leading Complex Teams Toward Collective Success

As healthcare design and construction projects grow in scale, complexity, and duration, teams increasingly include joint ventures, integrated partnerships, and “teams within teams.” This session explores practical strategies for building

alignment, trust, governance, and shared purpose across diverse organizations and perspectives. Attendees will gain insights into team selection, communication, performance metrics, and overcoming silos to create cohesive leadership and stronger collaboration, turning complexity and differing perspectives into strengths that support successful outcomes.

SPEAKER

Bob Feldbauer — Chief Program Delivery Officer, Children's Health

MODERATOR

Greg Francis — Vice President, Healthcare, Jacobs

LOCATION

IFHE Stage

11:30 a.m. – 12:00 p.m.

IFHE Attendees

AI and the Future of the Built Environment: Strategy, Transformation, and What Comes Next

Artificial intelligence is rapidly reshaping the built environment through changes in operational strategy, infrastructure intelligence, workforce dynamics, predictive analytics, automation, and decision-making. This session provides a deeper examination of how AI is evolving within facility operations, engineering, and healthcare infrastructure, and where the market is heading next. You'll get practical insights into the shifts driving industry-wide transformation, including data architecture, system interoperability, operational workflows, and emerging leadership considerations. The discussion is designed for leaders seeking a clearer understanding of AI's long-term impact on the future design, operation, and management of the built environment.

SPEAKER

Carl Fleming — Healthcare Strategy & Digital Transformation, DPR

LOCATION

IFHE Stage

12:00 – 1:00 p.m.

HOSTED MEAL

IFHE Attendees

Networking Lunch (IFHE Badges)

IFHE-funded lunch for World Congress participants, providing dedicated time to connect with peers from other countries, compare challenges, and build relationships that support ongoing collaboration after the event.

LOCATION

IFHE Hall

1:00 – 1:30 p.m.

SESSION

IFHE Attendees

Flexibility, Standardization, and the Cost of Customization

Standards help organizations decide what job needs to be done, make clear tradeoffs, and move design work faster while improving buying power and

controlling cost. But healthcare facilities operate in a changing world, so designs also need enough flexibility to adapt to new products, technologies, and ways of delivering care. This session looks at how to strike the right balance between standardization and flexibility so teams avoid overdesign, protect budgets, and keep options open for the future.

SPEAKERS

Sean McShane — Senior Project Manager, Norton Health

Josh King — Vice President, Facilities Planning and Development, Appalachian Regional Healthcare

Lynn Murphy — Associate Vice President, Facilities Planning, UK HealthCare

Mohammad Alai — formerly Director of Design, Central Florida Design and Construction, AdventHealth

MODERATOR

Anahita Razavi — Health Strategist and Speaker

LOCATION

IFHE Stage

1:30 – 2:00 p.m.

SESSION

IFHE Attendees

From Strategy to Performance: Executive Strategies for Operational Readiness

A focused look at how healthcare executives translate strategy into operational readiness — connecting capital decisions, organizational alignment, and day-to-day facility performance. Speakers share frameworks for keeping facilities, operations, and clinical priorities moving in the same direction under pressure.

SPEAKERS

Rick Hood — President and CEO, IMH Healthcare

Sam Werschky - Assistant Vice President Planning, Design & Construction, Cook Children's Health Care System

Marc Budaus - Partner, Health Studio Practice Leader, HKS, Inc.

Building for What's Next: Future-Ready Healthcare Campuses by Design

Healthcare design is shaped by geography, culture, and climate — yet every project ultimately serves the same human being. In this candid cross-continental dialogue, two of the field's most respected architects, Ray Pentecost and Fabio Bitencourt, compare lessons learned from North and South America to explore where healthcare design is heading next. Drawing on

decades of practice, research, and global advisory work, they will examine how human-centered design, sustainability, resilience, and emerging technologies are converging to reshape the patient experience worldwide. Expect a thoughtful, wide-ranging conversation on the ideas that will define healthcare environments for the next generation.

SPEAKERS

Michael Malone — Vice President of Operations, Vaughn Construction

Jen Rodosta — Executive Vice President, Strategic Initiatives, Children's Health

Rachel Knox — Studio Practice Leader, Health and Partner, HKS, Inc.

MODERATOR

Judah Auld — Vice President of Preconstruction, McCarthy Building Companies, Inc.

LOCATION

Powerful Conversations: Connection Drives Performance

Across healthcare facilities work, the pressure to coordinate, schedule, and deliver has crowded out the conversations that actually shape team performance. Drawing on his book *Powerful Conversations: How to Talk About What Matters Most in Work and Life*, Kyle Majchrowski opens Day 2 with a people-first look at how clarity, trust, and intentional dialogue translate directly into project outcomes across cultures, organizations, and roles. Expect a candid, interactive session that challenges leaders to look beyond process and toward the conversations their teams aren't yet having, and the performance waiting on the other side.

Healthcare Security: A Vital Design Issue

Violence, theft, and security incidents increasingly shape how healthcare environments are designed, operated, and staffed. This session explores security as a core design and infrastructure issue, not just an operational add-on, highlighting lessons from systems in the United States and Latin America. Speakers discuss how to balance openness and safety, integrate technology and human factors, and collaborate across clinical, security, and facilities teams to create environments that protect people without undermining trust.

SPEAKERS

John Demming — Market Director, Security Operations, AdventHealth · VP, IAHS

Francisco Villegas — Director de Seguridad Corporativa, Christus Muguerza

Melanie Wright — Regional Business Development Manager, HID Global

Brett Bramlett — Safety, Security & Parking Director, HH Health System

MODERATOR

Healthcare Facilities for the Future: Lessons from Japan

Japan's rapidly aging population is reshaping healthcare delivery, care management, and facility needs. Drawing from Japan Facility Management Association award-winning healthcare projects, this session explores how planning, design, construction, and facility management work together across the facility lifecycle. Participants will learn how Japanese healthcare organizations are adapting their facilities for chronic care, community-based care, patient-centered environments, resilient infrastructure, infection control planning, lifecycle cost management, and sustainable operations in response to demographic change.

IFHE Exchange Pavilion: Data-Driven Decision-Making Across the Hospital Asset Lifecycle: How to Do More with Less

Norwegian hospitals are in a unique position, using the same software platform across construction projects, project controls, and asset management. Connecting master data, BIM, drawings, rooms, and asset information across the lifecycle creates unique opportunities to improve both project delivery and the utilization of existing facilities. The presentation will show live examples of space utilization using IoT sensors, connections between BIM and BMS systems, and AI-based analysis and prediction. Drawing on more than 20 years of experience, it demonstrates how connected project and operational data can support better investment decisions and help hospitals do more with less.

\$2 TRILLION INVESTED

Why Is the Average Operating Margin Between 1-3%?

Healthcare systems are under pressure to modernize facilities, adopt AI, and transform care—all while operating on razor-thin margins. This panel brings together healthcare system owners and partners focused on capital development, technology, operations, and AI governance to discuss solutions top tier healthcare organizations are using to prioritize investment, manage risk, and turn transformation into measurable value.

SPEAKERS

David Tibi - CEO at TOCCorp, AI-Driven Healthcare Capital Project and Care Delivery platforms.

Charles Auger - Group Chief Information Officer at American Hospital Dubai

Jess Langerud - Principal Program Manager, UCI Health

Melinda deHoll – Harvard Senior Executive Fellow and author of “Leading AI Adoption in Healthcare: AI Does Not Adopt Itself.”

SESSION

Attendees

Rethinking the Healthcare Footprint: Distributed Care, Scaled Performance

Distributed care is often framed as the answer to access and capacity pressures, but design alone cannot fix what policy, payment, and infrastructure leave unresolved. This session looks at distributed care as part of a broader ecosystem shaped by payer mix, broadband and telehealth access, workforce realities, and rural economics. Speakers separate where the built environment can move the needle from where systemic reform must lead, so owners and designers can plan smaller, smarter facilities that scale performance without overpromising what architecture can solve.

SPEAKERS

Katie L. Vander Putten, AIA, EDAC — MOA Architecture

Scott Czubkowski, PE, CHC, CHFM, DHM — Ascension Health

MODERATOR

SESSION

Attendees

Read the Label: What's Really Inside Healthcare Finishes

A food label can tell a buyer a lot. Healthy ingredients often lead to better food and better choices. This session asks whether owners, designers, and facility leaders should look just as closely at the “ingredients” that go into healthcare finishes. The session will explore how material health, indoor air quality, aesthetics, durability, recycling, repurposing, energy use, and reduced manufacturing waste provide a more complete view of product value, helping create healthier environments while supporting long-term sustainability and performance.

SPEAKERS

Jonathan North - Senior Director, Sustainability, Mohawk Industries

Linnea Rehnke - Manager Capital Projects, Advocate Health

LOCATION

IFHE Exchange Pavilion in the HCD Expo Hall

2:30 – 3:30 p.m.

AWARDS & CLOSING

Attendees

International Building Awards (45 min) & Closing Events (15 mins)

International Building Awards ceremony (approximately 45 minutes) followed by formal Closing Events (approximately 15 minutes), recognizing outstanding healthcare facility projects and bringing the 2026 IFHE World Congress to a close.

SPEAKERS

Switzerland — to promote IFHE 2027

Fábio Bitencourt — to promote Brazil IFHE 2028

LOCATION

IFHE Stage

4:00 – 6:00 p.m.

TOUR

IFHE Attendees

IFHE Hospital Tours

Guided tour of a New Orleans-area healthcare facility, offering IFHE delegates a firsthand look at local design, engineering, and operations practices. Logistics and capacity to be confirmed.

LOCATION

To Be Announced

Presenter Bios

Alphabetical by last name. Session references below each entry link back to the program.

The 2026 IFHE World Congress brings together a global community of healthcare facility leaders, designers, engineers, clinicians, and industry experts.

Mohammad Alai, AIA, ACHA

Director of Design

[Office of Design and Construction, AdventHealth](#)

With more than 40 years of experience in healthcare planning, design, and project management, Mohammad Alai provides leadership in the development of design standards, project management guidelines, contract strategies, and systemwide approaches to medical and master planning. He has led the planning and delivery of numerous healthcare projects, including AdventHealth's 14-story West Tower, the 12-story AdventHealth for Women Tower, the 14-story Ginsburg Tower, a Patient Tower at AdventHealth Celebration, and the eight-story Executive Tower on the AdventHealth Orlando campus.

[SPEAKING IN](#)

"Flexibility, Standardization, and the Cost of Customization"

Larry Alexander

Chief Growth Officer

[KR Wolfe](#)

With over 20 years of experience driving strategic growth, Larry has led high-performing teams across a wide range of organizations, including Fortune 10 companies, private equity-backed firms, and privately held businesses. His leadership on company boards and within executive teams has consistently delivered record-setting results.

SPEAKING IN

“Equipment as Infrastructure: Bridging Capital Projects and Operations”

Judah Auld

Vice President, Preconstruction

McCarthy Building Companies, Inc.

Judah Auld is Vice President of Preconstruction at McCarthy Building Companies, where he brings more than 26 years of construction industry experience, including 19 years with McCarthy. A recognized leader in healthcare construction, Judah has spent much of his career supporting complex projects for some of Texas's premier healthcare providers, including MD Anderson Cancer Center, Texas Children's Hospital, and CHRISTUS Spohn Health System. Most recently, Judah served as Preconstruction Executive for the New Pediatric Campus, leading the McCarthy Vaughn Partnership's preconstruction efforts through a highly collaborative and integrated design process. His expertise in planning, estimating, and stakeholder alignment has helped deliver innovative healthcare environments that support both patient care and operational excellence.

SPEAKING IN

(Moderator) "Building for What's Next: Future-Ready Healthcare Campuses by Design"

Charles Aunger

Group Chief Information Officer

American Hospital Dubai

Charles Aunger is Group Chief Information Officer at American Hospital Dubai, leading the organization's transformation into a secure, AI-enabled, future-ready healthcare system. A globally experienced healthcare technologist with over 30 years of leadership across the USA, UK, and Middle East, he is known for turning complexity into clarity and strategy into execution.

SPEAKING IN

" The 3% Margin Problem: Can Healthcare Afford to Transform?"

Fábio Bitencourt

Architecture Professor

Architect

Fábio Bitencourt is an architecture professor and researcher in Rio de Janeiro, Brazil. He holds a Doctorate in Architecture and Master's Degree in Healthcare Comfort in Architecture. He is the author of numerous publications on hospital architecture, human comfort, healthcare environments and ergonomics. Fábio has served as a member of the Executive Committee of the International Federation of Healthcare Engineering (IFHE) since 2014.

SPEAKING IN

"Two Hemispheres, One Patient: A Global Conversation on the Future of Healthcare Design"

"Latin America: Healing Spaces, Use of Place, and Palliative Care Architecture"

"International Building Awards & Closing Events"

Brett Bramlett, MHA, CHPA, CHSP

Safety, Security, & Parking Director

HH Health System

Brett Bramlett is a healthcare security executive with more than 25 years of executive leadership experience. He serves as Director of Safety & Security for HH Health System, where he leads comprehensive safety, security, and workplace violence prevention programs. Under his leadership, the department earned the 2025 IAHS Lindberg Bell Award for Program Excellence, one of the profession's highest honors. Brett holds a Bachelor of Business Administration from Athens State University and a Master of Healthcare Administration from Louisiana State University Shreveport. He is a Certified Healthcare Protection Administrator (CHPA), Certified Healthcare Safety Professional (CHSP), and holds specialized certifications in Workplace Violence Prevention, Executive Protection, and Crime Prevention Through Environmental Design.

(CPTED). Brett is a Past Alabama IAHS Chair and currently serves as an IAHS Board Member-at-Large, where he is committed to advancing excellence in healthcare security.

SPEAKING IN

"Healthcare Security: A Vital Design Issue"

Marc Budaus, AIA, ACHA, EDAC, LEED AP

Partner, Health Studio Practice Leader

HKS, Inc.

Marc designs health facilities as if they were for his own family and friends. He understands the strong impact healthcare design has on people's lives, from the elation of a newborn baby to the heartbreak of saying goodbye to a loved one. He believes in being on the forefront of design, assisting clients to improve facility operations while focusing on total patient care, safety and well-being. Marc's many award-winning health facility designs have helped propel HKS to be a leader in the industry.

SPEAKING IN

"From Strategy to Performance: Executive Strategies for Operational Readiness"

Jonathan Cogswell

Vice President, Manhattan Development, Design & Construction

Northwell Health Facilities Services

Jonathan B. Cogswell is Vice President of Design & Construction at Northwell Health, where he oversees the planning and delivery of large-scale capital projects across the system. With more than 30 years of experience in healthcare facility operations and development, he has led the execution of complex planning and delivery initiatives including ambulatory care centers, hospital expansions, and full replacement hospital projects.

Jonathan began his career developing cancer centers throughout the New York metropolitan area before transitioning into hospital development leadership roles. He has spent the last 16 years at Northwell Health, where he played a key role in advancing major capital projects.

In addition to his professional responsibilities, Jonathan serves as Vice President on the Board of Directors for the Greater New York Chapter of the Association of Medical Facility Professionals and is Co-Chair of the Healthcare & Life Sciences Committee of the New York Building Congress.

SPEAKING IN

(Moderator) "The Infrastructure of Trust: Engineering the 'Big Blue Chair' Protocol"

Scott Czubkowski, PE, DBA-HM, CHC, CHFM

Senior Director, Engineering & Infrastructure

Ascension

Scott Czubkowski began his career as a mechanical test engineer supporting nuclear propulsion systems aboard 688-class fast attack submarines, where he completed four reactor start-ups. He later transitioned his expertise in heat transfer and fluid dynamics to health care facilities, building more than 30 years of experience delivering energy-efficient and sustainable infrastructure solutions across diverse care settings from urban acute care medical centers to rural and critical access hospitals.

Scott currently leads the Ascension Engineering & Infrastructure team, advancing strategies that reduce utility consumption, lower greenhouse gas emissions, and improve system performance. His work has produced measurable results, including steam-to-hot-water conversions reducing natural gas use by over 35%, and optimization of building automation and central energy plants cutting chilled water energy consumption by more than 20%. He also drives enterprise-wide energy analytics, utility procurement strategies, and national design standards that enhance operational efficiency and long-term asset performance.

He holds degrees in Mechanical Engineering, a Master's in Project Management, and a Doctorate in Business Administration with a health care management focus. His doctoral research on rural healthcare infrastructure provides insight on how to scale solutions for this population. Scott is widely recognized as a thought leader in healthcare energy management, delivering solutions that align patient care, sustainability, and financial stewardship.

SPEAKING IN

"Rethinking the Healthcare Footprint: Distributed Care, Scaled Performance"

Melinda deHoll, MSN, FACHE, AIGP

Melinda deHoll, MSN, FACHE, AIGP is a Harvard Senior Executive Fellow and author of “Leading AI Adoption in Healthcare: AI Does Not Adopt Itself.” Co-designed an enterprise-scale clinical AI prototype through the Veterans Health Administration’s competitive innovation pipeline in collaboration with Microsoft via the VHA Venture Studio. Currently advises boards and C-suite leaders on AI governance and adoption across healthcare, venture capital, and academia.

SPEAKING IN

"The 3% Margin Problem: Can Healthcare Afford to Transform?"

John Demming

Market Director

Security Operations, AdventHealth · VP, IAHS

John Demming, CPP, CHPA, is the Director of Safety & Security at Lakeland Regional Health, the 5th largest hospital in Florida and home to the 2nd busiest emergency department in the nation. He has over a decade of experience in the healthcare security and emergency management field. John earned a Master of Arts degree in Public Management from The Johns Hopkins University. His undergraduate studies were in Public Safety and Security at Florida State University. Demming currently serves as the Vice President/Secretary on the Board of Directors for the International Association for Healthcare Security & Safety. He has authored published works featured in The Journal of Healthcare Protection Management and the American Nurse Journal. He holds the credentials of Certified Protection Professional by ASIS International and Certified Healthcare Protection Administrator by the IAHS.

SPEAKING IN

(Moderator) "One Vision, Many Perspectives: Leading Complex Teams Toward Collective Success"

Gunnar Hansen

Business Development Manager for Healthcare

Omega 365

Gunnar Hansen is Business Development Manager for Healthcare at Omega 365 and a biomedical engineer with more than 20 years of experience in healthcare technology and digitalization. He has worked extensively with hospitals in Norway and internationally on the use of digital twins, IoT, BIM, and real-time data to improve how healthcare facilities are planned, delivered, and operated. Before joining Omega 365, Gunnar led smart hospital initiatives at Haltian, working with hospitals to apply sensor technology and digital twins to challenges such as space utilization, asset tracking, and operational efficiency.

SPEAKING IN

"Data-Driven Decision-Making Across the Hospital Asset Lifecycle: How to Do More with Less"

Yoshihisa Hirayama, AIA, ACHA

CEO

PS Company Ltd.

Yoshihisa Hirayama is Chief Executive Officer of PS Company Ltd, a Japanese manufacturer of HVAC systems. An active board member of the Healthcare Engineering Association of Japan since 2013, he has contributed to national HVAC design guidelines for healthcare facilities and has chaired its International Committee. Yoshi has represented Japan at the International Federation of Healthcare Engineering for over a decade and serves on multiple professional and technical committees. He holds a PhD in energy and the built environment, and lectures regularly at Japanese universities on healthy indoor environments and energy efficient buildings.

SPEAKING IN

(Moderator) "Healthcare Facilities for the Future: Lessons from Japan"

Rick Hood, CLSSGB

President/CEO

IMH Healthcare

Rick is an Executive Healthcare professional with domestic and international healthcare experience leading highly engaged teams, delivering exceptional patient experiences, and successful project execution. Rick has led diverse, multinational teams from across the globe in Abu Dhabi and geographically dispersed Support Service teams across 17 hospitals for IU Health. Rick has led the operational planning and activation of healthcare facilities ranging from large medical office buildings to the four million square foot Cleveland Clinic Abu Dhabi project. During his leadership tenure at CCAD, his teams were recognized with multiple awards, including the top-rated department for patient satisfaction scores as measured by Press Ganey International for two consecutive years.

“The Modern Operating Room: Designing and Sustaining Dependable, Adaptable, and Compliant Surgical Environments”

Melissa Keifer

Suffolk Construction

Melissa Kiefer is Vice President of Strategy at Suffolk Construction, where she focuses on scaling the operational ecosystem that enables operational excellence, talent development, client trust, and strategic growth to reinforce one another across the healthcare and life sciences sector. Her work helps teams frame challenges and solutions in ways that accelerate alignment and support decision-making from an owner-informed lens.

Prior to joining Suffolk, Melissa spent eight years at Hospital for Special Surgery, where she established and led the organization's first in-house Planning, Design, and Construction team and helped drive complex healthcare capital initiatives across New York, New Jersey, Connecticut, and Florida.

Her experience spans urban healthcare development, regulatory strategy, governance, and organizational alignment across operationally sensitive environments. Melissa serves on the Advisory Board of the Greater New York Chapter of the Association of Medical Facility Professionals and is passionate about strengthening collaboration, mentorship, and long-term trust across healthcare project teams.

SPEAKING IN

"The Infrastructure of Trust: Engineering the “Big Blue Chair” Protocol"

Joshua King, CHFM

Vice President of Facilities Planning and Development

Appalachian Regional Healthcare

Josh King serves as the Vice President of Facilities Planning & Development for Appalachian Regional Healthcare (ARH), a 14-hospital healthcare system serving communities across Kentucky and West Virginia. He leads systemwide capital planning, facilities operations, construction, and real estate strategy---driving modernization, infrastructure resilience, and long-term portfolio optimization. Previously, Josh served as Regional Director of Facilities Services for Kaiser Permanente in the Mid-Atlantic states, overseeing multi-site facilities operations across a large integrated delivery network. He is recognized for translating complex technical challenges into strategic, system level solutions.

SPEAKING IN

"Flexibility, Standardization, and the Cost of Customization"

Rachel Knox, AIA, ACHA, EDAC, LSSGB, LEED AP

Studio Practice Leader, Health; Partner

HKS, Inc.

Rachel Knox has dedicated her 20+ year career to the design of healthcare facilities. Her diverse project portfolio focuses on pediatric projects and lean delivery, and includes comprehensive master plans, greenfield replacement facilities, major expansions, and thoughtful renovations. She believes that excellent design solutions bring to life the unique, innovative ideas brought forth by patients, families, and staff.

SPEAKING IN

"Building for What's Next: Future-Ready Healthcare Campuses by Design"

Jess Langerud, MSN, CPM

Principal Program Manager

UCI Health

Jess Langerud, MSN, CPM, is a Principal Program Manager at UCI Health, leading growth and transformation initiatives across multiple projects, including the Irvine Medical Campus. Representing approximately 1.2 million square feet of healthcare facilities, the campus was developed through a \$1.3 billion investment to expand UCI Health's clinical capacity, research capabilities, and outpatient services across Orange County, California. It was also the first major healthcare transformation project completed within the University of California system and the nation's first all-electric acute care hospital.

& Outside Director of ITOKI Corporation

Shiro Nitnai is a director and fellow of Japan Facility Management Association (JFMA), visiting professor at the University of Tsukuba and Toyo University, and an outside director of ITOKI Corporation. He has written for publications including the Hitotsubashi Business Review and has given presentations at conferences including Japan FM Conference (2008-2025), Korean FM Conference (2023), and World Workplace (WWP) (2003).

SPEAKING IN

"Healthcare Facilities for the Future: Lessons from Japan"

Deogratias Niyizonikiza

CEO

Village Health Works Hospital

In 2005, in one of the poorest rural villages of Burundi, Deo Niyizonikiza established Village Health Works, with the goal of removing barriers to human dignity and progress through access to compassionate quality health care and education based on critical thinking in a dignified environment. Thanks to the local community's participation, a small amount of seed money, and Deo's leadership, "the little clinic that could" opened a year later and has grown to become a state-of-the-art teaching regional hospital known as the Kigutu Hospital and Women's Health Pavilion. Deo's success and passion in creating a holistic community-driven organization model has made Village Health Works one-of-a-kind amongst the world's NGOs.

A sought-after speaker and lecturer on inspiring approaches to confronting global health inequities, Deo is the recipient of multiple prestigious awards and honors. His life journey is told in Pulitzer Prize-winner Tracy Kidder's book, *Strength in What Remains*.

SPEAKING IN

"Transforming Health Through Infrastructure: The Kigutu, Burundi Story"

Jonathan North

Senior Director, Sustainability

Mohawk Industries

When Jonathan North joined Mohawk in 2023, he brought with him more than three decades of global experience in sustainability and supply-chain transformation. His career has taken him from the UK to the U.S., the Netherlands, and Sweden---experiences that shaped his understanding of how circularity must adapt to different markets while driving toward the same goal: meaningful environmental progress.

Today, Jonathan leads Sustainability for Mohawk's North American business. His team manages the company's extensive certification portfolio, develops LCAs and EPDs that quantify product impacts, and advances material transparency through programs such as the Living Product Challenge. They also oversee ReCover, Mohawk's full-service end-of-life recovery and recycling program, and partner with the sales organization to equip customers with sustainability insights that support a more responsible built environment.

SPEAKING IN

"Latin America: Healing Spaces, Use of Place, and Palliative Care Architecture"

Katie L. Vander Putten, AIA, EDAC

President and Director of Healthcare

MOA Architecture

Katie L. Vander Putten, AIA, EDAC, NCARB, LEED AP BD+C, is the President and Director of Healthcare at MOA Architecture, a boutique design firm dedicated to creating places where people can thrive. Katie joined MOA to help build and lead its healthcare practice, bringing a career-long focus on healthcare planning and design.

She specializes in complex healthcare environments, including ambulatory surgery centers, behavioral health facilities, medical office buildings, and clinics. Katie is known for her ability to navigate operational, regulatory, and clinical challenges---translating them into thoughtful, efficient environments that improve patient outcomes and support care teams. She is particularly passionate about advancing access to care in rural communities, where thoughtful design can have an outsized impact.

In addition to her role at MOA, Katie currently serves as President of CAHED, the Colorado chapter of ASHE, where she is actively engaged in advancing healthcare facility leadership and collaboration across the state.

Katie became an architect for the balance of creativity and problem-solving, but remains inspired by the opportunity to make a meaningful difference in people's lives through healthcare design. Outside of work, she is a mom and outdoor enthusiast who values building a full and balanced life.

SPEAKING IN

"Rethinking the Healthcare Footprint: Distributed Care, Scaled Performance"

Anahita Razavi

Healthcare Construction Executive, Architect, and Speaker

Anahita Razavi is a healthcare construction executive, architect, and speaker with 20+ years of experience directing capital programs across academic health systems, federal facilities, and institutional environments. Most recently Director of Real Estate, Design, Construction and Signage at Inova Health System, she has led ambulatory and healthplex portfolios and developed systemwide design standards since pioneering integrated ambulatory care facilities in 2009. She speaks on healthcare design, patient experience, the ROI of human-centered built environments, and the thoughtful integration of artificial intelligence with existing healthcare facility platforms and operations. Her core philosophy is that the best buildings emerge when institutional culture, human experience, and technical expertise are integrated from the very first conversation. She holds a Master of Interior Architecture from the University of Antwerp, is a member of ASHE, and serves as Vice President of the AMFP National Advisory Board in DMV.

SPEAKING IN

(Moderator) "Flexibility, Standardization, and the Cost of Customization"

Jen Rodosta, FACHE

Executive Vice President, Strategic Initiatives

Children's Health

Jen Rodosta, FACHE, is a senior healthcare executive with extensive experience in strategic implementation, capital development, and organizational transformation. She currently serves as Executive Vice President of Strategic Initiatives at Children's Health and is a leader in developing a \$5 billion campus in collaboration with UT Southwestern Medical Center, one of the largest pediatric infrastructure investments in the country. With 20+ years in healthcare experience across acute, academic, and ambulatory care settings, Jen has led complex initiatives that integrate operational strategy, facility development and patient experience.

SPEAKING IN

"Building for What's Next: Future-Ready Healthcare Campuses by Design"

Todd Rylands, FL - CBC 126887

Director of Healthcare Renovation

Construction, Installation, and Integration, KR Wolfe

With more than three decades of experience, Todd brings deep expertise in construction theory, operations, and management. He has led a multi-state construction company specializing in commercial, industrial, and residential projects, and has directed large, complex portfolios across multiple markets. Todd is passionate about fostering organizational excellence through decisive strategy, strong accountability, and human-centered leadership.

SPEAKING IN

"Equipment as Infrastructure: Bridging Capital Projects and Operations"

Curtis Skolnick, MHA

System Director, Real Estate Strategy-Portfolio Healthcare Planning

CommonSpirit Health

Curtis works within Real Estate Strategy for CommonSpirit and leads a team of healthcare strategists and planners in an internal consulting role. He collaborates with Regional and Market leadership to ensure that any capital project and the resulting disposition of their physical care-based assets have a well thought-out market and data-driven basis for planning. He works with the entire National Real Estate Services (NRES) strategy platform and NRES partners, primarily in Planning, Design and Construction (PDC), as well as other subject matter experts across the system, to ensure that need-based sustainable solutions are developed and used to underwrite business plans for Strategy Review and the capital approval process to move to implementation.

He works to optimize the current portfolio as well as seek opportunities for portfolio and business growth to meet the strategic goals of the markets and the communities served. He provides a wide array of services to facilitate, support, and lead projects that allow Markets and Regions to make informed strategic and financially stable decisions.

His market planning work leads primarily to implementable strategic and master facilities plans for acute and ambulatory care assets. He fosters creative yet pragmatic solutioning and decision making while continually striving to improve and innovate in the way he approaches his work.

"The 3% Margin Problem: Can Healthcare Afford to Transform?"

Rahul Tikekar

Principal and Senior Vice President

Loring Consulting Engineers, Inc.

Rahul Tikekar is a recognized expert in the field of healthcare engineering, with over two decades of experience in world-class hospital and medical facilities design. He joined Loring in 2015 to build the firm's dedicated healthcare practice, now one of its most significant centers for project volume, growth, and revenue. Rahul now leads corporate wide healthcare for Loring. Under Rahul's direction, the Healthcare Group has had the opportunity to work for such acclaimed institutions as Mount Sinai Health System, NYU Langone, Montefiore Medical Center, Northwell Health, and NewYork-Presbyterian, and is looking to replicate its success and expand its geographic footprint nationwide.

From procurement to construction, Rahul is responsible for a large and diverse portfolio of critical infrastructure upgrades, new construction, and fit-outs for, among others: ambulatory care and surgical facilities, diagnostic imaging, critical care centers, cancer centers, children's hospitals, nursing homes, research laboratories, clean room pharmacies, dental schools, and behavioral health centers. He maintains high-level quality control on all projects to ensure the engineering designs meet client needs and industry standards, and plays a central role in supporting client relationships, developing new business opportunities, and mentoring young staff. Rahul holds an MBA from Baruch College, a Master of Science in mechanical engineering from the New Jersey Institute of Technology, and a Bachelor of Science in mechanical engineering from YC College of Engineering in his native India. He is licensed to practice engineering in multiple states and is a member of the Association of Medical Professionals (AMFP - Multiple Chapters), Healthcare Engineering Society of New York (HESGNY), , the American Society of Healthcare Engineering (ASHE), the Healthcare Facilities Management Society of NJ, and American Society of Heating, Refrigerating and Air-Conditioning Engineers (ASHRAE). In addition, Rahul sits on the Healthcare Committee of NYC Builds Bio and is a member and past award recipient of the Maharashtra Foundation, a charitable organization that helps the underprivileged in rural India.

Cook Children's Health Care System

Sam Werschky is currently the Assistant Vice President Planning, Design & Construction where he is responsible for the development and administration of Cook Children's Health Care System strategies in the areas of planning, design, and construction. He retired in 2017 after a 21 year career as a Civil Engineer in the United States Navy. While in the Navy he led diverse and complex engineering organizations around the globe providing construction and facilities management; capital planning; real estate and environmental services. After his retirement in 2017 and prior to joining the Cook Children's team he was the Assistant Director, Transportation and Public Works for the City of Fort Worth and Senior Project Manager with Broadus & Associate. He earned his Bachelor of Science in Agricultural Engineering and his Masters of Engineering in Civil Engineering from Texas A&M University. He is a registered Professional Engineer in Texas.

"Healthcare Security: A Vital Design Issue"

Barry Zuckerman, CHC, DBIA, LEED GA

Vice President, Design and Construction, Corporate Facilities Services

Northwell Health

Barry Zuckerman, VP of Capital Projects at Northwell Health, boasts over two decades of healthcare leadership. With a robust engineering background and project management expertise, he excels in innovatively positioning Northwell Health for success in today's dynamic healthcare market. Barry's seasoned career includes assisting the transition of organization from a local system to a distinguished regional and national healthcare leader. Overseeing diverse inpatient and outpatient projects, both large and small-scale, his collaborative leadership style emphasizes facility development and consensus-building. Barry remains dedicated to Northwell's continued growth and excellence in the healthcare industry.
