

Learning Objectives

After participating in this session, attendees should be able to:

- Describe the disease entity of keratoconus, especially its cause and modern treatment
- Describe the ophthalmic approach to allergic eye disease, especially our common pharmacological interventions and their risks
- Define atopic dermatitis and discuss its presentation
- Discuss how social and biological factors affect AD
- Discuss treatment options for AD
- Discuss the most up to date testing recommendations for venom allergies
- Discuss component testing in the evaluation of venom allergies
- Discuss treatment recommendations for venom allergies
- Describe consequences of FASTER Act implementation on January 1, 2023
- Compare the different hypotheses for food allergy development
- Identify potential future food allergy therapeutics
- Recognize the common infectious triggers of cytokine storm syndrome
- Discuss the genetic predispositions for developing cytokine storm syndrome
- Develop treatment strategies for cytokine storm syndrome
- Evaluate eosinophilia in the adult patient
- Evaluate angioedema in the adult patient
- Identify the different types of allergy to milk
- Discuss the long-term management of milk allergy

Registration

Members who have paid 2023 dues: **Free**
Members (*after July 5, 2023 add \$50): **\$200**
First 2 years out of Fellowship training: **\$50**
Fellows: **Free**
Non-Members (*after July 5, 2023 add \$100): **\$250**

If you are a member of the ASAAI and would like to make a donation/contribution to help offset our costs of the meeting, please send a check to 19 S Jackson Street Montgomery, AL 36104 and note in your memo line your intentions. Several of these costs involve expenditures of our current Fellows.

If you have questions, call Meghan Martin:
(334) 954-2513

Thank you very much from the leadership of the ASAAI.
