

AGC's SUPERVISORY TRAINING PROGRAM

Unit 5: Productivity and Managing Project Costs

September 14, 15, 21 & 23, 2026

4:30 pm to 7:30 pm

AGC Offices – 1243 N 10th St., Ste 175 - Complimentary Parking in Structure on 9th Street
Cost: AGC GC/CM - \$200, AGC Associate - \$300, *CBA's - \$350, Non-Affiliated IAP - \$500
Presented by: Kevin Higgs, Langer Roofing & Sheet Metal, Inc.

In the competitive world of construction, maximizing productivity and effectively managing project costs are essential for success. The Productivity and Project Costs unit in AGC's Supervisory Training Program, 10th edition provides you with the tools and techniques to monitor, manage, and optimize these critical aspects of your projects.

- **Tracking Productivity:** Learn how to systematically track productivity on your construction site. Understand the key performance indicators (KPIs) that matter and how to use them to gauge efficiency and performance.
- **Managing Project Costs:** Discover strategies for accurate cost estimation, budgeting, and cost control. Learn how to monitor expenses in real-time and make data-driven decisions to keep your projects on budget.
- **Data-Driven Decisions:** Gain insights into how tracking productivity and costs can enhance not only current project success but also provide valuable data for future projects. Use historical data to predict challenges and create more accurate project plans.

Unit 5 explores:

- Introduction to Project Costs and Productivity
- Field Cost Control
- Labor Productivity
- Post-Project Evaluation
- Creating the Project Budget
- Cost Control Reports
- Equipment Productivity

Participants must have an eReader for this class.
