Effective planning and scheduling are the backbone of any successful construction project. The Planning and Scheduling unit in AGC's Supervisory Training Program, 10th edition equips you with the technical skills necessary to ensure your projects run smoothly from start to finish.

- **Comprehensive Project Planning:** Learn how to meticulously plan every aspect of your project. From initial concept to final completion, understand how to create detailed project plans that anticipate challenges and streamline operations.
- **Utilizing Schedules:** Discover how to develop and manage project schedules that communicate your plan clearly to all stakeholders. Learn techniques to track progress, adjust timelines, and ensure timely project completion.
- **Tracking Progress:** Master the tools and methods for monitoring project milestones and performance. Gain insights into identifying potential delays and implementing corrective actions to keep your project on track.

Unit 3 Explores:

- Planning and Scheduling
- Elements of Scheduling
- Developing Project Schedules
- Communicating Project Schedules
- Updating Project Schedules
