

AGC's SUPERVISORY TRAINING PROGRAM

Unit 6: Managing Risks

October 5, 7, 12 & 14, 2026

4:30 pm to 7:30 pm

AGC Offices – 1243 N 10th St., Ste 175 – Complimentary Parking in Structure on 9th St.
Corp G.C. - \$200, Associate - \$300, CBA's - \$350, Non-Affiliated IAP - \$500

Construction projects come with inherent risks, but effective risk management can significantly enhance project outcomes. The Managing Risks unit in AGC's Supervisory Training Program, 10th edition focuses on identifying, assessing, and mitigating risks to ensure your projects are safe, cost-effective, and on schedule.

Identifying Risks: Learn how to identify potential risks early in the project lifecycle. Understand the different types of risks, including safety, financial, quality, and schedule-related risks.

Risk Evaluation and Mitigation: Discover techniques for evaluating risks and developing effective mitigation strategies. Learn how to create solutions that shift risk and enhance project success.

Comprehensive Risk Management: Understand the importance of a comprehensive risk management plan. Gain skills in implementing and monitoring risk management practices that ensure project resilience and reliability.

Unit 6 explores:

- Risks in Construction
- Risk Assessment
- Problem-Solving Tools
- Categories of Risk
- Risk Management
- Solutions for Common Risks

Participants must have an eReader for this class.
