

North Platte Regional Airport– Lee Bird Field Industrial Park

Today's business and industry leaders recognize the importance of efficient and effective access to both commercial and private air service as well as to convenient freight service. With this in mind, the North Platte Airport Authority has initiated steps to develop the Platte Valley Air Park. Due to an extensive levee protection system this 200 acre business park has a 100 year flood plain designation. The park will offer competitively priced business/industrial lots that have easy access to Interstate 80 and U.S. Highways 30 and 83. Lots in the Platte Valley Air Park range in size from 2.5 to 200 acres.

Lease terms and conditions are negotiable. In addition, the North Platte community will work with business and industry to develop build-to-suit projects at very competitive prices. Persons with interest in space at the Air Park can contact the North Platte Airport Authority or the Development Corporation of North Platte.
