

March 2026 Luncheon

Safety and Security

Securing the Fan Experience

Austin McKenna - Executive Director, Safety & Security

Kronke Sports & Entertainment

Vehicle Mitigation

- ▶ Rated by calculating the impact rating of a barrier to stop a vehicle
- ▶ Calculation uses the weight of the vehicle, the speed at which the vehicle is traveling, and the distance traveled
 - Types of barriers
 - Passive Barriers (fixed)
 - Fixed Bollards
 - Planters / Landscaping
 - Concrete Barriers
 - Active Barriers (Operable / Temporary)
 - Bollards that raise or lower into the ground
 - Gates
 - Drop Arm Barriers

Traffic Mitigation

- ▶ Designed to manage traffic flow and secure areas by not allowing unauthorized vehicles
- ▶ Ratings: Don't always need a vehicle mitigation rating
- ▶ Types of barriers
 - Concrete / Tread barriers
 - Water filled barriers
 - Type 1,2, or 3 barriers

Emergency Response

- Create Emergency Response Plans for both event times as well as all other times that don't include events
- Work closely with local and federal emergency responders to create the procedures
- Command Center
 - A fully operational Command Center is run 24 hours a day
 - Who operates within that Command Center is determined by event time vs nonevent time

Security & Safety Staffing for Events

- Internal Security department
- Event Security staffing department
- Event Safety department
- Law Enforcement
- Fire Department
- Medical Services
- Bomb Dog vender

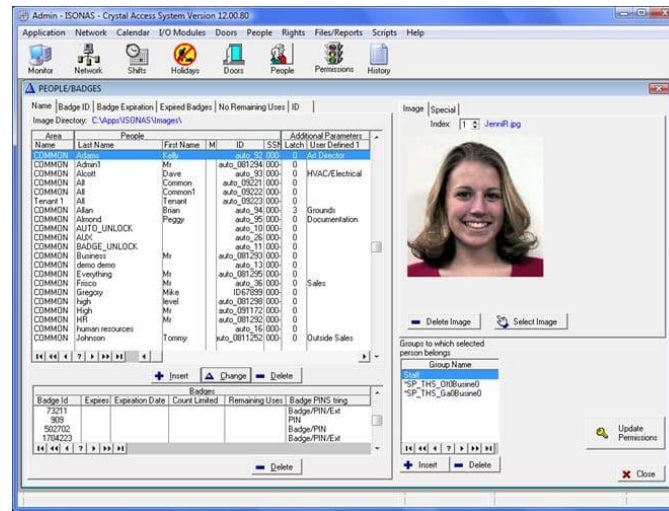

Access control systems

**Rachel Slotnick,
ETG Systems**

What is: ACCESS CONTROL

What are: access control components and principles

Industry and technology trends

- What is hot in the industry
- Use cases
- Issues facing facility and security managers
- Future decisions you'll have to make
- Common vulnerabilities

ark.com • 1746408842

Key takeaways:

Own your system:

- Ask for as-builts
- Have regular backups
- Maintain key system, biting matrix, records
- Don't be held hostage, open platform or keep in mind potential migration

Maintain it:

- Plan for maintenance and upgrades, 7-10 yrs lifespan
- Mechanical locks need lubrication and adjustments
- Batteries need replacing, like fire systems
- Log into it periodically, learn to use it

Vendors:

- Find someone you trust and build relationships
- Not all systems are created equal, ask for details, various scenarios
- Ask about ongoing fees or other "hidden" charges
- Online costs for equipment is misleading (turnkey is not wholesale)
- Ask your peers if you suspect price gouging or other issues

Thank You!

Risk Mitigation and Security During Turbulent Times

Practical Preparedness for the Unpredictable

Chris Harms, Allied Universal

Why is Risk Mitigation & Security Important?

Legal Duty: Colorado Premises Liability Act – C.R.S. § 13-21-115

Real estate owners and facility managers owe a duty of care to individuals on their property, categorized as invitees, licensees, or trespassers...managers must exercise reasonable care to protect against dangers they knew or should have known about. This includes maintaining safe conditions and addressing known hazards promptly.

Legal Definitions:

- *Invitee: Someone who is invited onto the property for business (e.g., a customer).*
- *Licensee: Someone allowed on the property for non-business reasons (e.g., a social guest).*
- *Trespasser: Someone who enters or remains on the land without the landowner's consent.*

Physical Security - Active & Passive

Environmental Design

- Warning signs
- Fencing
- Bollards, barriers, and posts
- Eliminate hiding places
- Site lighting
- Vehicle height restrictions

Access Control

- Keypads
- Access cards/fobs/apps
- Biometrics

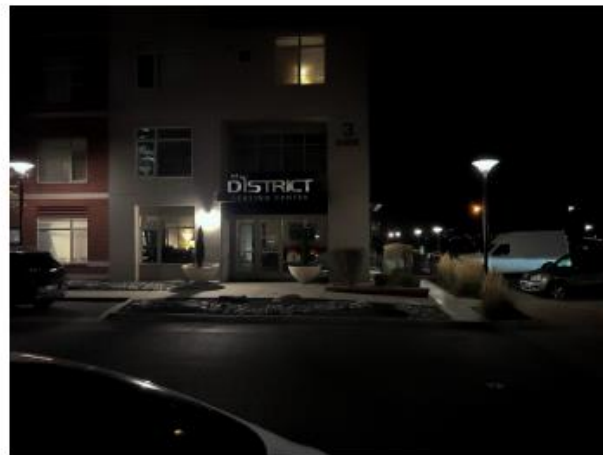

Source: Erik Beutler, Green is Greater

Intrusion Detection

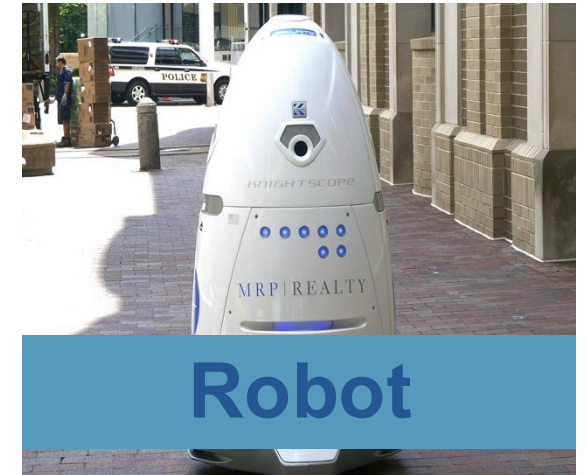

- Motion sensors, door/window contacts, etc.

Video Monitoring

- Might not catch someone “in the act”
- Video can help identify the person(s) responsible

Physical Security Patrols

One Size Does Not Fit All

Risks are Typically Most Effectively Mitigated by Integrated Solutions

People + Process + Technology

Which risk? Which control?

Functions of Countermeasures and Controls

There are **seven** things that a security control can hope to achieve

Deter

Make asset a less attractive target.

Control Access

Keep the asset out of reach.

Detect

Discover a harmful event happening.

Delay

Slow progress or impact.

Assess

Identify needed action.

Respond

Interrupt or reduce impact.

Record

For incident for follow-up.

Functions of Countermeasures and Controls

Detect

- Intelligence and Awareness
- Video Surveillance
- Identity Based Access
- AI and Analytics
- Humans

Respond

- Advance Planning
- Training
- Supporting Infrastructure
- Humans

Control Access

- Physical Barriers
- Access Control Technology
- Automation (Lock-down)
- Humans

Delay

- Physical Barriers
- Rapid / Mobile Deployment
- Humans

Visitor Management?

- Flipper Zero

Flipper Zero is a portable multi-tool for pentesters and geeks in a toy-like body. It loves hacking digital stuff, such as radio protocols, access control systems, hardware, and more. It's fully open-source and customizable, so you can extend it in whatever way you like.

Sources: <https://flipperzero.one/>, https://en.wikipedia.org/wiki/Flipper_Zero
<https://counterespionage.com/flipper-zero-corporate-security/>

Visitor Management?

- Handheld ID Copier

- Copy Any Key –

(The kiosks enable users with low-frequency RFID keys—such as access cards for offices, parking lots or apartment buildings—to create copies of their RFID cards...the duplicate will then be shipped to the individual's home within two or three business days.)

Cybersecurity Breaches

Cybersecurity breaches expected to increase worldwide in all sectors

Energy, finance, technology and manufacturing are high-risk targets

Projected increases in cloud environment intrusions/cloud-conscious cases

Increase in Generative AI-related attacks around KPI logistics

Ransomware/malware/data breaches (abuse of valid credentials) most common attacks

Manufacturing sector most targeted

Personal Cybersecurity Best Practices

Use a *passphrase*:

!AdelynIsMySw33tLittlePrincess42!

Enabling two-factor authentication (2FA)

Lie on security questions:

- *Where did you go to high school?*
Farmville
- *In what city was your first job?*
Cleveland

A personal hotspot is much safer than public Wi-Fi (coffee shops, airports, hotels)

Avoid introducing yourself to unknown callers.
“Hello?” instead of “Hello this is Chris.”

Risk Mitigation Strategies

- **Implement Surveillance Systems:** Install security cameras around the property to deter criminal activity and assist in investigations if incidents occur.
- **Enhance Lighting:** Ensure that parking lots and building entrances are well-lit to discourage unauthorized access during nighttime hours.
- **Access Control:** Utilize keycard systems or security personnel to monitor and control entry points to the building.
- **Community Engagement:** Participate in local neighborhood watch programs and maintain open communication with local Police Department for updates on crime trends and safety resources.
- **Employee Training:** Provide training for staff on safety protocols, emergency procedures, and how to report suspicious activities.

Thank You
