WELCOME

TO THE 31st ANNUAL APPE INTERNATIONAL CONFERENCE

Founded in 1991 as an organization dedicated to teaching and embedding the practice of ethics and ethical decision-making into all aspects of society, the work of the Association for Practical and Professional Ethics (APPE) is more relevant now than ever.

Through this conference and its other programming, APPE facilitates scholarly exchange, supports a network of individuals and institutions committed to bridging ethics theory with practice, and serves as an advocate for the practical application of ethical principles across all sectors of society.

Together, we take rigorous academic work and make it relevant and actionable in the real world. Because of the commitment and involvement of people like you, APPE is making a difference across the United States and beyond.

Society, Culture, and Value: Ethical Decision Making During a Global Pandemic

Session Chairs: Kory Trott, Charles de Souza

Ethical decision making during a global pandemic requires individuals and organizations to navigate a complex and evolving environment that consists of multiple stakeholders with different mandates, agenda, plans and priorities. The issues that have arisen during the COVID-19 pandemic are multidisciplinary and require an ability to synthesize and integrate all these factors and their relationships.

This 3-hour workshop provides a framework for ethical public health policy development, which includes: the dynamic nature of the public health policy arena, the factors that influence decision makers, as well as an understanding that values and lived experience are vital inputs during the decision making process.

This hands-on workshop gives attendees an opportunity to step into the roles of federal, state, local, and organizational officials in order to think through the societal, political, economic, and human aspects of key public health policy decisions that have occurred thus far during the COVID-19 pandemic. These interactive and engaging discussions will benefit from the diverse perspectives and unique experiences of the attendees. A specific interest or expertise in public health is not required. All that is needed in a curious mind and a willingness to respectfully explore the ethical dimensions of challenging issues.

The case studies will also give attendees an opportunity to practice navigating contentious issues in a classroom setting, a valuable skill to practice for anyone involved in teaching ethics.

Learning Objectives:

• Learn frameworks for analyzing complex public health policy problems in a systematic way

• Learn how to incorporate data, law, values, and lived experience into the calculus of public health

• Learn how to clearly outline articulate and justify public health policy decisions

• Learn how incorporating ethics into the decision making process can lead to public health policy that promotes health and builds trust

Workshop Leaders: Kory Trott, JD, MPH–Virginia Tech, Research Integrity and Consultation Program, Director and Charles R. de Souza, PhD–Virginia Tech, Science Policy Postdoctoral Associate

Annual Conference Opening and Plenary Speaker
Dr. Kim TallBear
Indigenous Inclusion, Reconciliation, and Decolonization in Science

Sponsored by Northern Plains Ethics Institute
Session Venue: Hall of Mirrors

Scientific research, technology, and related policy are performed within our society that is structured at its foundations by hierarchical, Eurocentric, and colonial narratives and worldviews. No one is exempt from such influence, including scientists, engineers, and other disciplinarians. Dr. TallBear highlights colonial assumptions and practices, and resistance to those ideas in several research case studies drawn from biological and environmental sciences. She also highlights a program that helps train Indigenous genome scientists in order to increase the benefit of genome research for Indigenous peoples. Dr. TallBear provides those within and beyond the university an analytical framework to understand the relationships between "equity and inclusion," "reconciliation,"; and "decolonization" in order to help us envision possibilities and concrete steps for science and technology to aid decolonization.

Ethics of AI and Health Care: Towards a Substantive Human Rights Framework

Sponsored By: Albert Gnaegi Center for Health Care Ethics
Session Venue: Hall of Mirrors

There is enormous interest in using artificial intelligence (AI) in health care contexts. But before AI can be used in such settings, we need to make sure that AI researchers and organizations follow appropriate ethical frameworks and guidelines when developing these technologies. In recent years, a great number of ethical frameworks for AI have been proposed. However, these frameworks have tended to be abstract and not explain what grounds and justifies their recommendations and how one should use these recommendations in practice. In this presentation, Matthew shall propose an AI ethics framework that is grounded in substantive, human rights theory and one that can help us address these questions.

WHAT ARE THE CONSEQUENCES OF COVID-19 IN OUR COMMUNITY?
Wednesday, March 16, 6-7:30 pm ET
Indianapolis | Virtual details, TBD

The consequences of the Covid-19 pandemic will be felt in our community for years, from the way we conduct business to the way we educate our children. But the area that has been most affected as a result–for better or for worse–will likely be our healthcare system.

We will hear from a panel of local public health professionals and reporters to better understand a number of issues that have come to light or been exacerbated as a result of the pandemic: public trust in science and healthcare; the allocation of scarce resources; the impact on rural and other minority populations; Indiana's health rankings and its relationship to our state's public health spending; and more.

The discussion will feature Chad Priest, CEO of the American Red Cross – Indiana; Dr. Aaron Carroll, a pediatrician who is the chief health officer for Indiana University and a frequent contributor to The New York Times; and Farah Yousry, Side Effects reporter for WFYI and The Indianapolis Recorder. It will be moderated by APPE member Kory Trott, the director of The Research Integrity and Consultation Program at Virginia Tech.

HOW TRUE IS WHAT I READ IN THE NEWS AND WHY SHOULD I CARE?
Thursday, March 31, 6-7:30 pm ET
Indianapolis | Virtual details, TBD

It's no secret that Americans' trust in the media has been sharply declining in recent years. There are various reasons for this shift, including the collapse of local news outlets, the rise of disinformation campaigns, and the ideological bifurcation of cable news. To many people, "the media" has an agenda and is biased.

We'll talk to a panel of local and national journalists to get their side of the story. What goes on in a newsroom to give us faith that the news being reported isn't fake, but rather is fact-based? What are the ethical standards that journalists adhere to? How do they ensure that their reporting is fair and balanced? How has the rise of social media disrupted the way we consume news?

Together, we'll learn from these professionals about what makes them journalists, how we can empower and seek out trustworthy journalists, and why it matters that those who deliver the news earn (and keep) our trust.

The panel will feature Arika Herron (The Indy Star), Farah Yousry (WFYI, The Indianapolis Recorder) and Erik Wemple (The Washington Post). It will be moderated by APPE member Dr. Lee Anne Peck, a specialist in journalism ethics.

These programs are made possible thanks to a partnership between The Indianapolis Public Library, Butler University's College of Communication, WFYI, the Society of Professional Journalists and the Association for Practical and Professional Ethics. Grant funding was provided by Indiana Humanities with funds from the American Rescue Plan.

Ethics and Applied Philosophy in the PDC E-Collection

The **Philosophy Documentation Center** provides access to an array of journals that explore moral and practical questions in business, education, the environment, government, health care, law, psychology, science, technology and more.

Explore unique journals and their take on important questions. All journals are fully searchable— back issues included with online access.

A peer-reviewed forum for interdisciplinary research that explores the systemic causes of ethical challenges in business and professional life. It publishes original articles that examine why global ethical issues, such as poverty alleviation and sustainability, emerge and persist.

Business and Professional Ethics Journal
www.pdcnet.org/bpej

Articles, reviews and discussions exploring the philosophical aspects of environmental problems. Since 1979 it has provided a peer-reviewed forum for diverse interests, bringing together the non-professional environmental philosophy tradition with the professional interest in the subject. Published by the Center for Environmental Philosophy at the University of North Texas.

Environmental Ethics
www.pdcnet.org/enviroethics

Peer-reviewed articles, discussion papers, and book reviews for persons working and thinking within the broad field of "environmental philosophy." It welcomes diverse approaches to environmental issues, including those inspired by the many schools of Continental philosophy, studies in the history of philosophy, indigenous and non-Western philosophy, and the traditions of American and Anglo-American philosophy.

Environmental Philosophy
www.pdcnet.org/envirophil

Committed to the view that philosophy can and should be brought to bear upon the practical issues of life. It publishes peer-reviewed work in ethics and applied philosophy, focused on issues in business, education, the environment, government, health care, law, psychology, and science.

International Journal of Applied Philosophy
www.pdcnet.org/ijap

Peer-reviewed articles and reviews that examine social, economic, political and cultural problems within the context of Christian social ethics. It promotes scholarly work in Christian ethics and the relation of Christian ethics to other ethics traditions, and is an essential resource in religious studies.

Journal of the Society of Christian Ethics
www.pdcnet.org/jsce
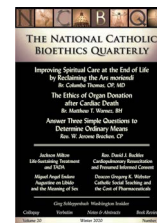

The official journal of the National Catholic Bioethics Center, an organization dedicated to research and analysis of ethical issues arising in health care and the life sciences. The journal seeks to foster intellectual inquiry by publishing articles that address the ethical, philosophical, spiritual, and clinical questions raised by modern medical sciences.

The National Catholic Bioethics Quarterly
www.pdcnet.org/ncbq

This journal presents original work by leading social philosophers, political scientists, lawyers, and social scientists from various countries. It publishes peer-reviewed articles drawn from papers submitted for the North American Society for Social Philosophy (NASSP) conference, as well as original submissions not presented at the annual conference.

Social Philosophy Today
www.pdcnet.org/socphiltoday

Dedicated to ethical issues across the curriculum with particular attention to pedagogical methodology and practice in both academic inquiry and professional practice. The journal's editorial focus is on ethics as a dimension of all academic inquiry rather than as an isolated philosophical discipline.

UNIVERSITY OF MIAMI
ETHICS PROGRAMS

30 THREE DECADES OF EDUCATION & RESEARCH SINCE 1991

The University of Miami Ethics Programs, including the Institute for Bioethics and Health Policy, and the APPE were both established some three decades ago. We're now proud to be able to serve on APPE's Board of Directors and otherwise to support the important mission of our longstanding partner.

Indeed, 2022 marks the 30th anniversary of the "Florida Bioethics: Debates, Decisions, Solutions" conference. In conjunction with the Florida Bioethics Network. We believe it is the largest and longest-running community-based ethics event in the country.

The
Ethics
of
Engagement

Directors:

Deborah Mower (University of Mississippi)
Alan Preti (Rosemont College)

We welcome submissions addressing any aspect of teaching ethics across the curriculum. For this year's conference we have a **special interest in approaches for teaching ethics as it relates to interpersonal, civic, institutional, and community engagement.** Possible topic areas include (but are not limited to) increasing civic virtues; promoting civil discourse; developing empathy and moral sensitivity; developing trust and collaboration; advancing racial equity and social justice; benefits of engagement and policy approaches (e.g., psychological, health, economic, political/legal, or enforcement); opportunities and outcomes; communication with community partners and media effects; ethical practices for student leadership, volunteer, & internships.

Submissions are to be abstracts of no more than 250 words; session formats include papers, panels, case study analysis and discussion, poster sessions and pedagogical demonstrations. Undergraduate and graduate students are encouraged to submit their work. Presentations are typically 20-25 minutes in length, allowing for 5-10 minutes of Q&A. Submissions are to be formatted for blind review.

In-person conference with limited slots for virtual presentation. Submission deadline of **August 1. Early submissions (by July 1) receive special consideration**. The Society sponsors a competition for the best paper submitted by a graduate student. The winner receives a $500 cash award and free conference registration. The Society publishes *Teaching Ethics*, and conference papers may be sent to the editors for publication consideration.
