BEFORE THE COMMISSIONER OF COMMERCE AND INSURANCE FOR THE STATE OF TENNESSEE

IN THE MATTER OF:)	
)	
NATIONAL COUNCIL ON)	No.: 20-172
COMPENSATION INSURANCE, INC.)	
ASSIGNED RISK RATE FILING AND)	
LOSS COST MULTIPLIER)	

ORDER APPROVING WORKERS' COMPENSATION ASSIGNED RISK RATE FILING AND LOSS COST MULTIPLIER

Pursuant to Tenn. Code Ann. § 56-5-114(c)(6)(B), the Commissioner of the Department of Commerce and Insurance ("Commissioner") shall annually establish the multiplier to be applied to the advisory prospective loss cost for the assigned risk plan. Additionally, this matter was presented for consideration in accordance with Tenn. Code Ann. § 50-6-402(b), which requires the Commissioner to consult with the Advisory Council on Workers' Compensation ("Advisory Council") before approving any workers' compensation loss cost filing made by the designated rate service organization and approve, disapprove, or modify the filing within ninety (90) days of receiving the filing.

On August 27, 2020, the National Council on Compensation Insurance ("NCCI") submitted its annual Tennessee Workers' Compensation Assigned Risk Rate and Rating Values Filing ("Assigned Risk Rate Filing") with a proposed effective date of March 1, 2021. The filing proposed a decrease in the overall Assigned Risk Rate level of seven and two tenths percent (7.2%) from the rates in effect March 1, 2020, consisting of an overall negative nine and two tenths percent (-9.2%) workers' compensation voluntary loss cost level change and a two and

two tenths percent (2.2%) increase in the Assigned Risk Loss Cost Multiplier.

The Assigned Risk Rate Filing included an adjustment in the Loss Cost Multiplier

("LCM") increasing the LCM from one and seven hundred fifty-three thousandths (1.753) to one

and seven hundred ninety-one thousandths (1.791), effective March 1, 2021.

Tenn. Code Ann. § 56-5-114(c)(6)(B) requires the Commissioner to establish the LCM

taking into consideration the estimated cost of providing plan services and the level of

multipliers in the voluntary market.

Pursuant to Tenn. Code Ann. § 50-6-402(c), the Commissioner provided notice of the

intent to increase the LCM from one and seven hundred fifty-three thousandths (1.753) to one

and seven hundred ninety-one thousandths (1.791) to the Advisory Council on September 4,

2020. The Advisory Council did not provide written comments or recommendations to the

Commissioner in response to the intended change in the LCM.

Upon consideration of the factors set forth in Tenn. Code Ann. § 56-5-114(c)(6)(B),

consideration of the estimated cost of providing plan services, the multipliers in the voluntary

market, and the level of plan utilization compared to the voluntary market, the Commissioner

APPROVES an increase of the LCM from one and seven hundred fifty-three thousandths (1.753)

to one and seven hundred ninety-one thousandths (1.791), effective March 1, 2021.

It is the determination of the Commissioner that pursuant to Tenn. Code Ann.

§ 56-5-114(c), the assigned risk rate change would constitute an overall decrease of seven and

two tenths percent (7.2%) from the overall Assigned Risk Rate level that became effective

March 1, 2020. Pursuant to Tenn. Code Ann. § 56-5-114(c), the Assigned Risk Rate Filing

herein is APPROVED to an overall decrease of seven and two tenths percent (7.2%) for the

Order Approving Workers' Compensation Assigned Risk Rate Filing and

Tennessee Workers' Compensation Assigned Risk Plan that became effective March 1, 2020.

The approved adjustments shall become effective March 1, 2021.

It is so **ORDERED**.

ENTERED AND EXECUTED November 14, 2020.

BEFORE THE COMMISSIONER OF COMMERCE AND INSURANCE FOR THE STATE OF TENNESSEE

IN THE MATTER OF:)	
)	
NATIONAL COUNCIL ON)	No.: 20-173
COMPENSATION INSURANCE, INC.)	
WORKERS' COMPENSATION)	
LOSS COST FILING)	

ORDER APPROVING WORKERS' COMPENSATION LOSS COST AND RATING VALUES FILING

This matter was presented for consideration in accordance with Tenn. Code Ann. § 50-6-402(b), which requires the Commissioner of the Department of Commerce and Insurance ("Commissioner") to consult with the Advisory Council on Workers' Compensation ("Advisory Council") before approving any workers' compensation loss cost filing made by the designated rate service organization and approve, disapprove, or modify the filing within ninety (90) days of receiving the filing.

On August 27, 2020, the National Council on Compensation Insurance ("NCCI") submitted its annual Workers' Compensation Voluntary Loss Cost and Rating Values Filing ("Loss Cost Filing") with a proposed effective date of March 1, 2021, which recommended an overall DECREASE of nine and two tenths percent (9.2%) from the loss cost that became effective March 1, 2020.

The Advisory Council met on October 16, 2020, to consider the NCCI filing relative to the voluntary loss cost pursuant to Tenn. Code Ann. § 50-6-402(b) and, by letter to the Commissioner dated October 19, 2020, recommended a loss cost decrease of eight and four tenths percent (8.4%)

rather than the nine and two tenths percent (9.2%) decrease proposed by the NCCI.

Upon reviewing the information provided by the NCCI, the information presented to the Advisory Council by the Advisory Council's actuary and the Department's consulting actuary is the determination of the Commissioner the NCCI Loss Cost Filing submitted by the NCCI on August 27, 2020, should be **APPROVED** to reflect an overall DECREASE of nine and two tenths percent (9.2%) from the voluntary loss cost that became effective March 1, 2020. Furthermore, the Workers' Compensation Voluntary Loss Cost and Rating Values are **APPROVED** and shall

It is so **ORDERED**.

become effective March 1, 2021.

ENTERED AND EXECUTED November 14, 2020.

Re: Tennessee Workers Compensation Assigned Risk Rates and Rating Values Filing – Proposed Effective March 1, 2021

Dear Commissioner Mainda,

In accordance with the applicable statutes and regulations of the State of Tennessee, we are filing for your consideration and approval prospective rates and rating values for the assigned risk market to become effective March 1, 2021.

The assigned risk rates, which are proposed to be effective March 1, 2021, reflect a change of -7.2% from the rates effective March 1, 2020.

This filing is made exclusively on behalf of the companies that have given valid consideration for the express purpose of fulfilling regulatory rate or pure premium filing requirements and other private use of this information.

In the enclosed appendix is a list of companies, which, at the time this filing is being submitted, are eligible to reference this information. The inclusion of a company on this list merely indicates that the company, or the group to which it belongs, is affiliated with NCCI in this state, or has licensed this information as a non-affiliate, and is not intended to indicate whether the company is currently writing business or is even licensed to write business in this state.

Assigned Risk Rate Filing - March 1, 2021

Disclosures

Purpose of the Report

The purpose of this report is to provide the proposed assigned risk rates for workers compensation policies in Tennessee, proposed to be effective March 1, 2021. The intended users of this report are:

- State of Tennessee Department of Commerce and Insurance
- Affiliated carriers, for their reference in determining workers compensation rates

Scope

Employers unable to secure coverage in the voluntary market can apply for such coverage in the assigned risk market. The proposed assigned risk rates are intended to cover the indemnity and medical benefits provided under the system, the expenses associated with providing these benefits (loss adjustment expenses), and any other costs associated with providing workers compensation insurance (such as commissions, taxes, etc.).

Although considered, since the combined impact and direction of all direct and indirect COVID-19 related forces is unknown, no explicit adjustment has been made in this year's analysis at an overall or individual classification code level.

Data Sources and Dates

NCCI recently submitted a voluntary advisory loss costs and rating values filing to the Tennessee Commissioner of Commerce and Insurance. The assigned risk rates proposed in this filing are based on the recently filed voluntary advisory loss costs, with an assigned risk loss cost multiplier applied.

The overall average rate level change in this filing is based on premium and loss experience evaluated as of December 31, 2019. Therefore, this data does not reflect any potential direct or indirect effects of the COVID-19 pandemic.

In some areas, NCCI's analysis also relies on other data sources, which are reviewed for reasonableness and are referenced in the filing where applicable.

Risks and Uncertainty

This filing includes assumptions and projections concerning the future. As with any prospective analysis, there exists estimation uncertainty in these assumptions and projections. Areas of this analysis subject to estimation uncertainty that could have a material impact on the final results include the following:

Assigned Risk Rate Filing - March 1, 2021

Disclosures

- Projection of future loss development
- Selection of loss ratio trends
- Potential impact of changes to laws and/or regulations

In addition, any future changes to workers compensation law or regulations that apply retroactively to policies or benefit claims on policies in the proposed effective period may have a significant impact on the adequacy of the assigned risk rates proposed in this filing.

The premium and loss experience on which this filing is based does not reflect potential direct or indirect effects of the COVID-19 pandemic. At this time, the course of the pandemic remains unclear and represents a significant source of uncertainty with respect to estimating workers compensation system costs for the proposed loss cost effective period.

The direct effect of compensable claims resulting from COVID-19 infections may put upward pressure on workers compensation costs, as could certain indirect effects. For example, there is potential for the weakened labor market to lengthen return-to-work times or adverse loss development to occur if the pandemic serves to increase the time to medical treatment for injured workers. However, it is possible that other various effects may put downward pressure on workers compensation costs—such as increased telecommuting, decreased exposure to motor vehicle accidents, and an increased use of telehealth for injured workers. Additional COVID-19-related considerations, such as future economic conditions and their corresponding impact on the labor market, contribute additional uncertainty when estimating future costs.

The ongoing COVID-19 pandemic creates additional uncertainty regarding the makeup and loss experience of the residual market. Employers who obtain policies in the residual market due to potential COVID-19 exposure may differ from the types of employers in the historical residual market data analyzed in this filing.

After considering direct and indirect pandemic-related factors, it is reasonable to believe they will give rise to component changes that may, to some extent, have offsetting impacts on workers compensation system costs. Although considered, since the combined impact and direction of all direct and indirect COVID-19-related forces is unknown, no explicit adjustment for the pandemic has been made in this year's analysis at an overall or individual classification code level.

Assigned Risk Rate Filing - March 1, 2021

Executive Summary

Based on its review of the most recently available data and the proposed overall average workers compensation voluntary market loss cost level change of -9.2% NCCI has proposed an average assigned risk rate level change of -7.2%% to become effective March 1, 2021.

Key Components	Percentage Change
Proposed Change in Overall Voluntary Loss Cost Level	-9.2%
Impact of change in Assigned Risk Loss Cost Multiplier	<u>+2.2%</u>
Proposed Change in Overall Assigned Risk Rate Level	-7.2 %

Selections Underlying Proposed Changes	Approved March 1, 2020	Proposed March 1, 2021
Assigned Risk Loss Cost Multiplier	1.753	1.791
Assigned Risk Loss Cost Differential	1.400	1.450
Assigned Risk Permissible Loss Ratio	0.692	0.703
Uncollectible Premium Provision	1.032	1.035
Expense Constant	\$160	\$160
Maximum Minimum Premium	\$1,250	\$1,250
Minimum Premium Multiplier	200	200

Please refer to the "Additional Proposed Change" section in Part 1 of the recently filed voluntary advisory loss costs and rating values filing for information on other notable change underlying this filing.

Assigned Risk Rate Filing - March 1, 2021

Overview of Methodology

Assigned Risk Rates

The proposed assigned risk rates are determined for each job classification as the product of the classification's voluntary loss cost and an assigned risk loss cost multiplier (LCM). The LCM incorporates the indicated assigned risk market expense need and changes to the assigned risk differential.

Note: The methodology and assumptions used in this filing may not be applicable to or relevant for another purpose, including but not limited to NCCI filings in other jurisdictions.

Assigned Risk Rate Filing - March 1, 2021

Part 2 Proposed Values

- Proposed Assigned Risk Rates and Rating Values
- Proposed Values for Inclusion in the Experience Rating Plan Manual

Assigned Risk Rate Filing - March 1, 2021

Proposed Assigned Risk Rates and Rating Values

The following pages include proposed assigned risk rates and rating values:

- Assigned risk rates, minimum premium, expected loss rates, and d-ratios by class code, along with associated footnotes
 - The "X" footnote denoting a state special classification phraseology will no longer be shown on the following pages. Refer to the special classifications section of the Basic Manual for any state specific classification phraseology.
- Miscellaneous values, such as:
 - Maximum and minimum weekly payroll applicable for select class codes
 - o Premium determination for Partners and Sole Proprietors
 - Terrorism rate
 - United States Longshore and Harbor Workers' Compensation Coverage Percentage

S=Silica

- Rate provides for coverage under the United States Longshore and Harbor Workers Compensation Act and its extensions. Rate includes a provision for USL&HW Assessment.
- M Risks are subject to Admiralty Law or Federal Employers Liability Act (FELA). However, the published rate is for risks that voluntarily purchase standard workers compensation and employers liability coverage. A provision for the USL&HW Assessment is included for those classifications under Program II USL Act. The listed codes of 6702, 6703, 6704, 7151, 7152, 7153, 8734, 8737, 8738, 8805, 8814, and 8815 under the Federal Employers' Liability Act (FELA) for employees of interstate railroads are not applicable in the residual market.
- N This code is part of a ratable / non-ratable group shown below. The statistical non-ratable code and corresponding rate are applied in addition to the basic classification when determining premium.

Class	Non-Ratable
Code	Element Code
4771	0771
7405	7445
7431	7453

P Classification is computed on a per capita basis.

* Class Codes with Specific Footnotes

- 1005 Rate includes a non-ratable disease element of \$1.17. (For coverage written separately for federal benefits only, \$1.15. For coverage written separately for state benefits only, \$0.02.)
- 1016 Rate includes a non-ratable disease element of \$3.53. (For coverage written separately for federal benefits only, \$3.46. For coverage written separately for state benefits only, \$0.07.)
- 2702,2705 An upset payroll of \$10.00 per cord shall be used for premium computation when payroll records are not available.
 - Rate and rating values only appropriate for laying or relaying of tracks or maintenance of way no work on elevated railroads. Otherwise, assign appropriate construction or erection code rate and elr each x 1.215.
 - Rate and rating values only appropriate for laying or relaying of tracks or maintenance of way no work on elevated railroads. Otherwise, assign appropriate construction or erection class rate x 2.533 and elr x 2.415.
 - Rate and rating values only appropriate for laying or relaying of tracks or maintenance of way no work on elevated railroads. Otherwise, assign appropriate construction or erection class rate and elr each x 1.35.

Effective March 1, 2021

APPLICABLE TO ASSIGNED RISK POLICIES ONLY

(Multiply a Non-F classification rate by a factor of 2.11 to adjust for differences in benefits and loss-based expenses. This factor is the product of the adjustment for differences in state and federal benefits (2.00) and the adjustment for differences in state and federal loss-based expenses (1.057).)

Experience Rating Eligibility

A risk qualifies for experience rating on an intrastate basis when it meets the premium eligibility requirements for the state in which it operates. The eligibility amount varies by rating effective date. The *Experience Rating Plan Manual* should be referenced for the latest approved eligibility amounts by state and by effective date.

Assigned Risk Rate Filing - March 1, 2021

For Expected Losses greater than \$3,867,750, the Ballast Value can be calculated using the following formula (rounded to the nearest 1

Ballast = (0.10)(Expected Losses) + 2500(Expected Losses)(8.10) / (Expected Losses + (700)(8.10)

G = 8.10

Assigned Risk Rate Filing – March 1, 2021

Part 3 Supporting Exhibits

- Determination of the Indicated Assigned Risk Rate Change
- Exhibit I: Derivation of Assigned Risk Loss Cost Multiplier
- Exhibit II: Derivation of Assigned Risk Differential
- Exhibit III: Calculation of Assigned Risk Expenses
- Exhibit IV: Determination of Uncollectible Premium Provision

Assigned Risk Rate Filing – March 1, 2021

Determination of the Indicated Assigned Risk Rate Change

Overall Proposed Change to Assigned Risk Rate Level

NCCI applies an assigned risk loss cost multiplier to the voluntary market loss costs to convert to assigned risk rates. This factor accounts for differences in the components included in the assigned risk rates versus the voluntary market loss costs. The key components of the assigned risk loss cost multiplier are the assigned risk differential, assigned risk expenses, and uncollectible premium provision (UPP). Voluntary market loss-based expenses must also be removed in the calculation, since the servicing carrier allowance already contemplates these expenses for the assigned risk market. Thus, the assigned risk loss cost multiplier formula is as follows:

Assigned Risk Loss Cost Multiplier = $(AR \ Differential) \div (Voluntary \ LAE) \div (PLR) \times UPP$

This filing proposes a 2.2% increase in the assigned risk loss cost multiplier from 1.753 to 1.791. After applying the proposed change in the assigned risk loss cost multiplier to the proposed change in voluntary loss costs, NCCI is proposing an overall average decrease of 7.2% to the current assigned risk rate level. The detailed calculation can be found in Exhibit I.

Assigned Risk Differential

The assigned risk loss cost differential reflects the fact that the collective experience for employers in the assigned risk market is typically worse than that of employers in the statewide market. Loss ratios are calculated for both the (i) assigned risk market and (ii) statewide market by individual year as follows:

 $\frac{\text{(total on - leveled losses)}}{\text{(total on - leveled, developed standard premium at the voluntary level)}}$

Loss ratio relativities are reviewed for ten individual years so that changes in the actual differentials can be observed over a long period of time. When selecting the assigned risk differential, the impact of additional premium that is already expected to be generated due to other assigned risk programs (e.g. Assigned Risk Adjustment Program) is also considered.

Based on this year's analysis, NCCI is proposing to increase the approved assigned risk differential from 1.400 to 1.450. The data underlying this selection is shown in Exhibit II.

Assigned Risk Rate Filing – March 1, 2021

Determination of the Indicated Assigned Risk Rate Change

Assigned Risk Expenses

The provision for assigned risk expenses is based on the following components:

- Servicing Carrier Allowance (SCA) the market-based cost paid to the servicing carriers
 as a percentage of final collected net premium that is intended to compensate for
 expenses incurred in handling the assigned risk business. The average SCA is
 determined through a competitive bid process and reflects items such as general
 expense, production expense (excluding commission), loss adjustment expense and
 certain assessments.
- Premium Taxes not included in the Servicing Carrier Allowance
- Assigned Risk Administration Expense reflects NCCI Plan Administration Expenses, NWCRA Pool Administration Expenses, and Servicing Carrier Other Expenses. It is selected based on a review of expenses as a percentage of premium over the past ten years.
- Average Commission based on a weighted average of the most recently available two policy years
- Profit and Contingency Provision

Note that the expense components that are based on net premium are converted to a standard premium basis excluding the impact of expense constants. Then the total assigned risk expenses are used to determine the Permissible Loss Ratio (PLR):

$$PLR = 100\% - (provision for Assigned Risk Expenses)$$

In this filing, NCCI is proposing a 1.6% decrease to the current assigned risk expense provision. The calculation of assigned risk expenses can be found in Exhibit III.

Uncollectible Premium Provision

The purpose of the uncollectible premium provision is to make available sufficient funds in the rate structure to offset the policy premium ultimately determined to be uncollectible. NCCI recommends increasing the uncollectible premium provision to 1.035. The data underlying this selection is shown in Exhibit IV.

Exhibit I

Derivation of the Assigned Risk Loss Cost Multiplier

This filing proposes a -7.2% overall average change to the current assigned risk rate level. For all classifications, an assigned risk multiplier is applied to the voluntary loss costs proposed effective March 1, 2021 in order to convert to assigned risk rates.

(1)	Current Assigned Risk Loss Cost Multiplier	1.753
(2)	Proposed Assigned Risk Loss Cost Differential (See Exhibit II)	1.450
(3)	Proposed Voluntary Loss-based Expense Provision	19.2%
(4)	Indicated Assigned Risk Permissible Loss Ratio (See Exhibit III)	70.3%
(5)	Proposed Uncollectible Premium Provision (See Exhibit IV)	1.035
(6)	Indicated Assigned Risk Loss Cost Multiplier = ({(2) / [1 + (3)]} / (4)) x (5)	1.791
(7)	Indicated Change in the Assigned Risk Loss Cost Multiplier = $[(6) / (1)]$ - 1.0	2.2%
(8)	Proposed Voluntary Loss Cost Level Change	-9.2%
(9)	Indicated Assigned Risk Rate Level Change = {[1.0 + (7)] x [1.0 + (8)]} - 1.0	-7.2%

Exhibit II

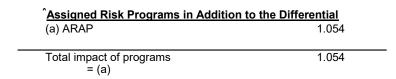

Exhibit III

Calculation of Assigned Risk Expenses

Section A - Expense Components of Assigned Risk Rate

The assigned risk expense provision including loss-based expenses is derived directly from the servicing carrier allowance, since this is the market-based cost to the assigned risk plan to have the plan serviced. The average commission rate, the profit and contingency provision, a provision for administrative expenses, and all taxes and assessments not included in the servicing carrier allowance must be added to the allowance to derive an average expense provision as a percentage of standard premium excluding the expense constants.

		Expense Provisions Underlying Proposed Rates
(1)	Expense Constant	\$160
(2)	Weighted-Average of Servicing Carrier Allowance Bids	19.1%
(3)	Premium Tax	4.0%
(4)	Assigned Risk Administration Expense (See Section B)	3.1%
(5)	Expense Constant Premium as a Percentage of Standard Premium Excluding the Expense Constant (See Section C)	3.4%
(6)	Servicing Carrier Allowance, Taxes and Administrative Expense Converted to a Standard Premium Excluding Expense Constant Basis = [(2) + (3) + (4)] x [1 + (5)] - (5)	23.7%
(7)	Average Commission (See Section C)	6.0%
(8)	Profit and Contingency Provision	0.0%
(9)	Total Expense Provision in Rate = (6) + (7) + (8)	29.7%
(10)	Permissible Loss Ratio in Rate = 1 - (9)	70.3%
(11)	Current Permissible Loss Ratio in Rate	69.2%
(12)	Impact on Rate due to Change in Expenses = (0.692 / 0.703) - 1	-1.6%

Exhibit III

Calculation of Assigned Risk Expenses

Section B - Derivation of NCCI Plan Administration Expenses, NWCRA Pool Administration Expenses, and Servicing Carrier Other Expenses

	(1)	(2)	(3)
Calendar	Net Written		Expenses as % of NWP
Year	Premium ¹	Expenses	= (2)/(1)
2016	52,069,424	649,193	1.2%
2017	60,719,770	791,862	1.3%
2018	51,156,176	965,828	1.9%
2019	44,387,636	1,078,137	2.4%
		Average	1.7%
		Current	4.0%
		Selected	3.1%

¹ Gross of uncollectible premium.

Exhibit III

Calculation of Assigned Risk Expenses

Section C - Derivation of Expense Constant and Commission as a Percentage of Premium

Premium Distribution by Layer for Assigned Risk Policies for Policy Years 2018 & 2019

	(1)	(2) Standard	(3) 1
	Standard	Premium	
Portion of Total	Premium	Incl Exp Cnst	Commission
Standard Premium	Incl Exp Cnst	Distribution	Scale ²
First 1,000	18,897,887	19.4%	8.0%
Next 4,000	31,301,902	32.1%	6.0%
Next 95,000	43,343,126	44.4%	5.0%
Over 100,000	4,050,525	4.1%	3.0%
Total	97,593,440	100.0%	5.8%

(4) Expense Constant Premium as % of Standard Premium Excluding Expense Constant ³ =	3.4%
(5) Average Commission as a % of Standard Premium Excluding the Expense Constant 4 =	6.0%

¹ Totals represent weighted averages based on column (2).

² Commissions paid in Tennessee are based on standard premium including expense constant premium. Source of the commission scale is NCCl's Basic Manual, Rule 4-H-6.

Based on assigned risk policy and premium totals for policy years 2018 & 2019 using the dominant state method for the classification of multistate policies.

 $^{^{4}}$ (5) = (3) total * [1 + (4)]

Exhibit IV

Determination of Uncollectible Premium Provision

	(1)	(2)	(3) = (1) / (2)
	Estimated	Estimated	Gross Premium /
Policy	Ultimate Gross	Ultimate Collected	Collected
Year	Premium (\$000)	Premium (\$000)	Premium
		·	
2015	50,609	49,651	1.019
2016	56,055	53,695	1.044
2017	53,699	51,123	1.050
2018	53,582	51,274	1.045
		Average	1.040
		_	
		Current UPP	1.032
		Selected UPP	1.035

Assigned Risk Rate Filing - March 1, 2021

Part 4 Additional Information

- Key Contacts

Assigned Risk Rate Filing - March 1, 2021

Definitions

Accident Year (AY): A loss accounting definition in which experience is summarized by the calendar year in which an accident occurred.

Calendar Year (CY):

- 1. The 12-month period beginning January 1 and ending December 31.
- 2. Method of accounting for all financial transactions occurring during a specific year.

Case Reserves: Reserves that an insurance company establishes for specific (known) claims.

DSR Level Premium: The standard earned premium that would result if business were written at NCCI state-approved loss costs or rates instead of at the company rates. It is the common benchmark level at which carriers report premium on the Financial Calls.

Frequency: The number of lost-time claims per million dollars of on-leveled, wage-adjusted premium.

Incurred Claim Count: The total of all claims reported, whether open or closed, as of a given valuation date. An indemnity claim is associated with a payment or case reserve for an indemnity loss (i.e., lost work time-related benefits) and excludes claims closed without an indemnity payment.

Lost-time Claims: Claims where an injured employee has received wage replacement benefits due to a compensable workplace injury.

Limited Losses: Losses that result after the application of NCCI's large loss procedure—in which individual large claims are limited to jurisdiction and year-specific large loss thresholds.

On-Level Factor: Applied to historical premiums and losses to adjust the historical experience to reflect approved loss cost/rate level changes as well as statutory benefit level changes implemented since that time.

Paid+Case Losses: The sum of paid losses and case reserves. Also known as "case incurred losses."

Paid Losses: Losses that an insurance company has paid as a result of claim activity.

Policy Year:

- The one-year period beginning with the effective date or anniversary of a policy.
- A premium and loss accounting definition in which experience is summarized for all
 policies with effective dates in a given calendar year period.

Severity: The average cost per case (claim) calculated as ultimate losses divided by ultimate lost-time claim counts.

Assigned Risk Rate Filing – March 1, 2021

Definitions

Ultimate Development Factor: For an aggregation of data, an estimate of the development that will occur between the data's current valuation date and the time when all claims are closed.

Unlimited Losses: Losses that have not been limited to jurisdiction and year-specific large loss thresholds as part of NCCI's large loss procedure.

Valuation Date: The date that premiums and losses are evaluated for reporting purposes. Premiums and losses may change over time from initial estimates to final values. Therefore, interim snapshots have associated valuation dates.

Wage Level Adjustment Factor: The ratio of the average workers' wages during the most recent time period to the average workers' wages during a historical time period.

Hodgen Mainda Commissioner of Commerce and Insurance State of Tennessee 500 James Robertson Parkway Nashville, Tennessee 37243-0565

Re: Tennessee Workers Compensation Assigned Risk Rates and Rating Values Filing – Proposed Effective March 1, 2021

Dear Commissioner Mainda,

In accordance with the applicable statutes and regulations of the State of Tennessee, we are filing for your consideration and approval prospective rates and rating values for the assigned risk market to become effective March 1, 2021.

The assigned risk rates, which are proposed to be effective March 1, 2021, reflect a change of -7.2% from the rates effective March 1, 2020.

This filing is made exclusively on behalf of the companies that have given valid consideration for the express purpose of fulfilling regulatory rate or pure premium filing requirements and other private use of this information.

In the enclosed appendix is a list of companies, which, at the time this filing is being submitted, are eligible to reference this information. The inclusion of a company on this list merely indicates that the company, or the group to which it belongs, is affiliated with NCCI in this state, or has licensed this information as a non-affiliate, and is not intended to indicate whether the company is currently writing business or is even licensed to write business in this state.

Please contact me if you have any questions or need any further information

Sincerely,

Carla Townsend

State Relations Executive

Overview of the Proposed Tennessee Workers Compensation Loss Cost and Assigned Risk Rate Filings Effective March 1, 2021

I. Summary of Filing

The purpose of this overview is to provide context and further explanation for the accompanying proposed workers compensation insurance loss cost and assigned risk rate filings that were filed under separate cover by the National Council on Compensation Insurance (NCCI) on August 27, 2020, with the Tennessee Department of Commerce and Insurance for its review and approval. NCCI is a licensed rate service organization authorized to make recommended voluntary loss cost¹ and assigned risk rate² filings on behalf of workers compensation insurance companies in Tennessee. NCCI's filing is objectively prepared, in compliance with actuarial standards. The filings propose a -9.2% loss cost decrease in the voluntary market and a -7.2% decrease in the assigned risk market, effective March 1, 2021.

This filing comes at a time when, nationally, the workers compensation system is experiencing unprecedented results. The combination of underwriting discipline, moderating severity, declining frequency, and adequate reserves has resulted in six straight years of combined ratios under 100% (below 100% is indicative of an underwriting profit). For decades, with few annual exceptions, frequency has continued on a clear downward path driven by technology, safer workplaces, improved risk management, and a long-term shift from manufacturing to service sectors. NCCI has no expectation that this trend will change course. For the last several years, severity trends have remained fairly moderate, tracking very closely with wage inflation. For these reasons, NCCI's analysis has indicated decreases across most of its jurisdictions in recent years.

The filing is based on premium and loss experience for Policy Years 2017 and 2018. The financial data loss experience evaluated as of December 31, 2019 indicates more favorable development when compared with the loss data evaluated as of December 31, 2018. The experience is primarily driven by changes in lost-time claim frequency, which has continually declined since

¹ Loss cost refers to the portion of workers compensation rates filed by the rate service organization that are allocated to pay losses and not for carrier expenses. Some states include certain carrier expenses and assessments in the definition of advisory loss costs. Carriers can use the approved loss costs as the basis for their rates, typically adjusting them for expenses with a loss cost multiplier.

² The assigned risk rate is determined in accordance with the Assigned Risk Plan, a program established by state insurance regulatory authorities that sets the rules and procedures to provide insurance coverage to parties unable to obtain coverage in the voluntary market. For the assigned risk market, NCCI files a full rate that includes the servicing carriers' expenses.

Policy Year 2010. The smaller proposed assigned risk rate level decrease is due to the difference in experience compared to the voluntary market.

II. Overview of Ratemaking Methodology

NCCI's approach to determining the proposed overall average loss cost and assigned risk rate level change utilizes widely accepted actuarial ratemaking methodologies. The approach employed in this filing includes the following steps:

- Premium and loss information is adjusted to the latest approved loss cost and assigned risk rate and benefit levels
- These adjusted losses and premiums are used to calculate a loss ratio for each historical year (loss ratio = losses / premium)
- Loss ratios, along with other information, are analyzed in order to determine trend factors. Trend factors are applied to historical loss ratios to estimate loss ratios for the effective period in this filing.
- As a final step, any proposed benefit and/or expense changes are applied to the projected loss ratios

The average loss cost and assigned risk rate level change indicated by the data is calculated for the years in the filing's experience period. If the final projected loss ratios are greater (less) than 1.000, then an increase (decrease) in the average loss cost level is indicated.

Once the proposed voluntary loss cost and assigned risk rate level change is determined, NCCI separately determines loss costs/rates for each workers compensation job classification (class); the loss costs and assigned risk rates and year-over-year changes vary by class and are based on the available data for each job class. Finally, the proposed rates for the assigned risk market are determined for each job class by adjusting the voluntary loss costs/rates for expenses and other Assigned Risk programs.

III. COVID-19

The COVID-19 virus (coronavirus) is the latest in a series of infectious diseases that have emerged over the last 20 years. Since 2003, the world has seen the emergence of SARS, H1N1, Ebola, and Zika viruses. While the overall impact of each of those diseases has been well documented, potential impact of COVID-19 to the workers compensation system is in the very beginning stages of being understood; therefore, the data underlying this filing does not include claims from COVID-19. Due to the lack of this COVID-19-related ratemaking data and the current level of uncertainty, NCCI has not yet assessed the potential impact on future loss cost and assigned risk rate levels. As such, no explicit adjustments have been made in this filing for COVID-19. While it is possible that COVID-19 may result in significant adverse loss development and deteriorating loss ratios, the impact on overall system costs could be small.

It is reasonable to believe COVID-19 will give rise to component changes that may, to some extent, have offsetting impacts on system costs. For example:

- There could be an increase in the number of compensable workers compensation claims arising in frontline, COVID-19-related occupations
- There could be a decrease in workers compensation claims due to the increased number of employees who are teleworking

Short- and long-term COVID-19-related impacts may also differ. For example:

- In the short term, during the COVID-19 pandemic, there may be a reduction in the number of physical therapy sessions attended by injured employees and/or a deferral in the number of workers compensation-related surgeries that are not deemed to be immediately critical
- Over the longer term, an increase in these types of services may be expected as the current burden on medical-related personnel and facilities is lessened
- In economic downturns, workers may forego filing claims for relatively minor injuries to maintain active employment as the economy navigates these uncertain times—leading to temporary downward pressure on claim frequency

NCCI has begun researching and gathering information to preliminarily gauge the pandemic's direct and indirect impacts on claim frequency, severity, and durations. More in-depth analyses related to COVID-19's impact on frequency and severity will be conducted over time as additional aggregate data becomes available. It is anticipated that assessing the impact of the pandemic on claim durations will likely take longer, as claim-specific data would be required.

NCCI has also started accumulating pre-COVID-19-level benchmarks that will help facilitate preto post-COVID-19 comparisons in the future. For example, detailed medical reports along with associated metrics are being developed to analyze both the direct impacts (e.g., claim costs) and indirect impacts (e.g., whether the slowdown of medical treatments has returned to normal) of the COVID-19 pandemic.

In April 2020, NCCI published a white paper, "COVID-19 and Workers Compensation: Modeling Potential Impacts," which provides estimates of workers compensation system cost impacts under various hypothetical scenarios. NCCI also released an interactive tool that allows users to choose their own assumptions and model the potential impact to expected losses for the associated jurisdiction and workforce under the scenario framework described in the research brief. These and other related materials are available on NCCI's website at www.ncci.com.
