

In order to improve the efficiency in which the Stamford Chamber engages in pro-business advocacy, the Chamber is implementing a new Business Advocacy Policy. The policy establishes a clear process that members in good standing can follow to request the Chamber's public advocacy and support of an issue or initiative of importance to that member. The Stamford Chamber works with its members to support strategies and projects that promote, preserve, and enhance the business climate and drive economic development of the City of Stamford.

As a benefit of Chamber membership, a member may present their proposed project(s) and requested action by the Stamford Chamber to the Board of Directors for review and consideration. If you are seeking a letter of support, please provide adequate background information on the proposal and a proposed draft letter. Please also indicate if you would like a representative of the Chamber to present in-person comments at a public meeting on the issue. To allow for adequate consideration of the request, the Board of Directors ask that the Request for Advocacy Form be submitted 30 days prior to the action date.

The Stamford Chamber of Commerce advocates on behalf of our members by providing a collective and amplified voice on business and economic issues impacting the City of Stamford. As a voice of the community, we work to create an environment where business, both small and large, can thrive - creating positive impacts for Chamber members and their customers.
